Create a Dashboard

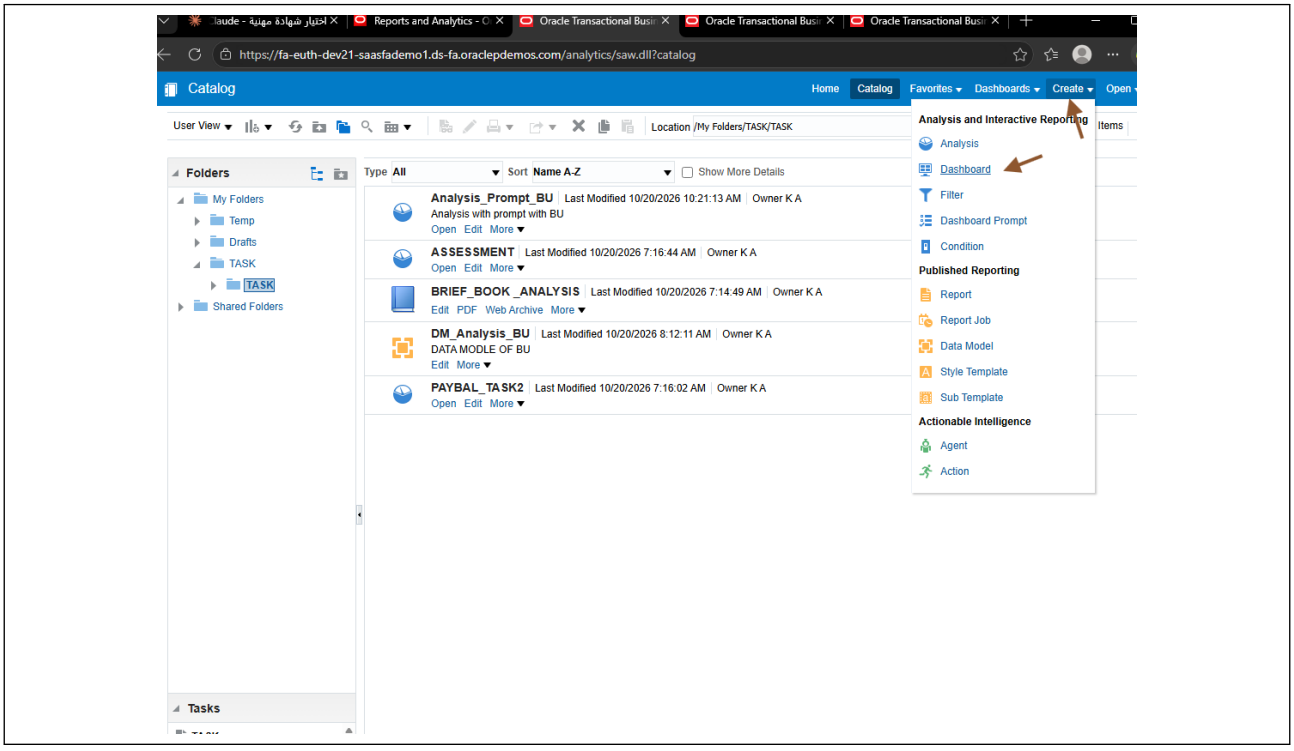

Goal: Create a dashboard **DB_KA** that stores your analyses in sections, run it, export it, and share the folder using **Archive / Unarchive**.

1. Log in and open the Catalog

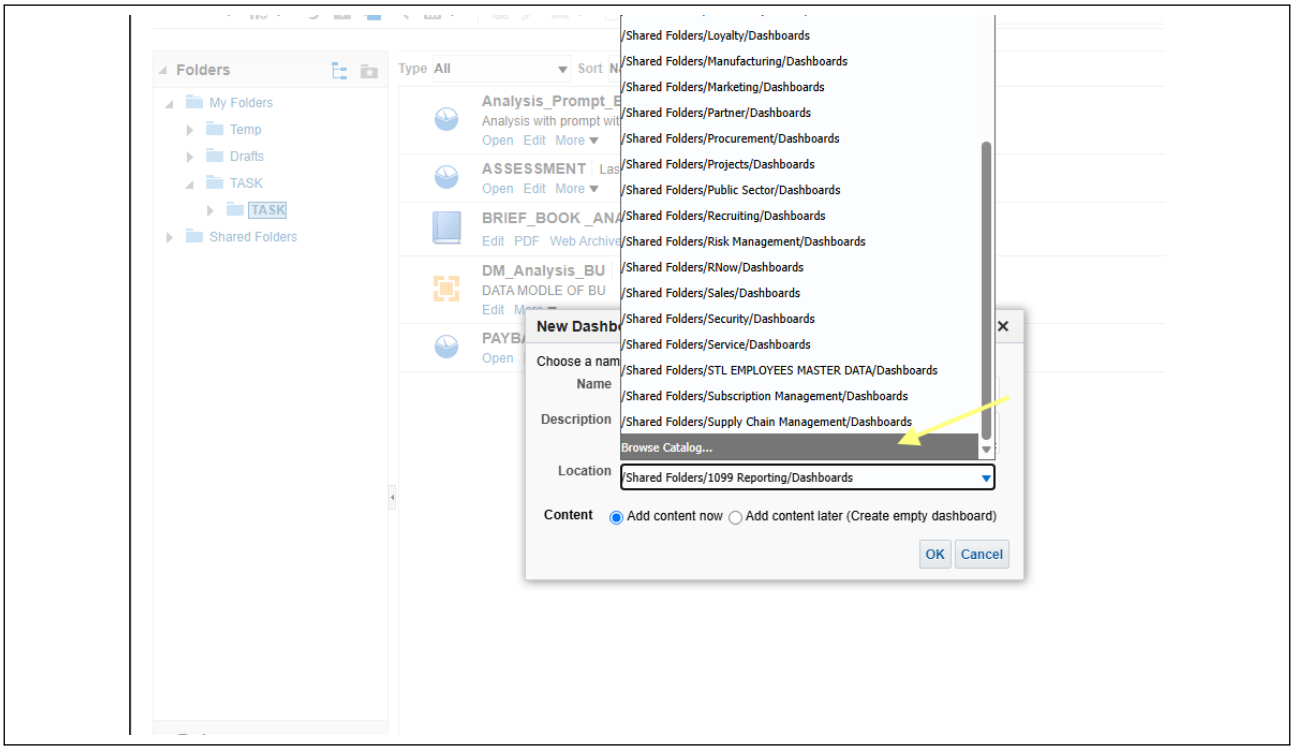

1. Open the **Oracle Fusion** link. On the **Oracle Cloud Sign in** page enter **your username** (K.A) and **password** > **Next**.
2. Click the **Navigator** (three lines, top left) > **Tools** > **Reports and Analytics**.
3. Click **Browse Catalog** (top right). The **Oracle Transactional Business Intelligence** Catalog opens.
4. In **Folders** open **My Folders** > **TASK**. Save all your work in this folder.

2. Create the Dashboard

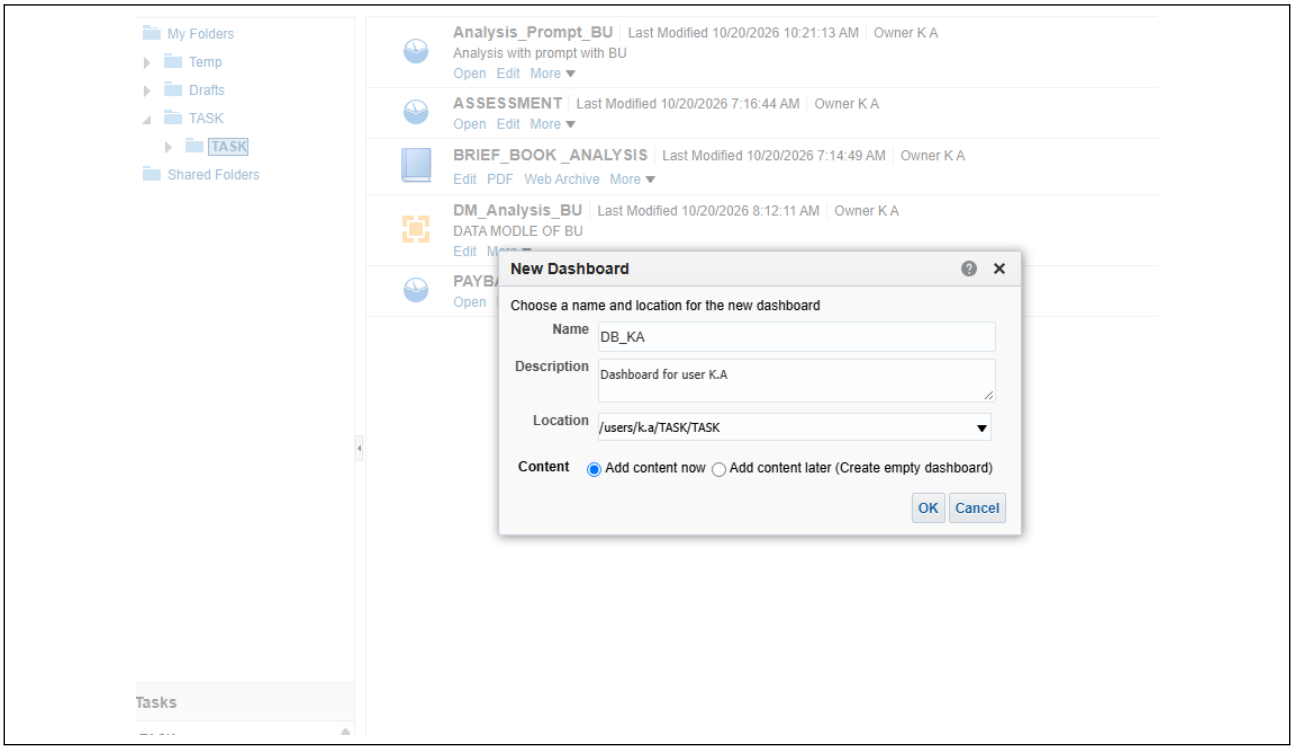

5. Catalog > **Create** > under *Analysis and Interactive Reporting* click **Dashboard**.
6. In **New Dashboard** enter Name **DB_KA**, Description **Dashboard for user K.A**.
7. Open the **Location** list > scroll down > **Browse Catalog...** > select your folder (**/users/k.a/TASK/TASK**).
8. Content = **Add content now** > **OK**. The Dashboard Builder opens on **page 1**.

Create > Dashboard

Location > Browse Catalog...

New Dashboard: DB_KA in /users/k.a/TASK/TASK

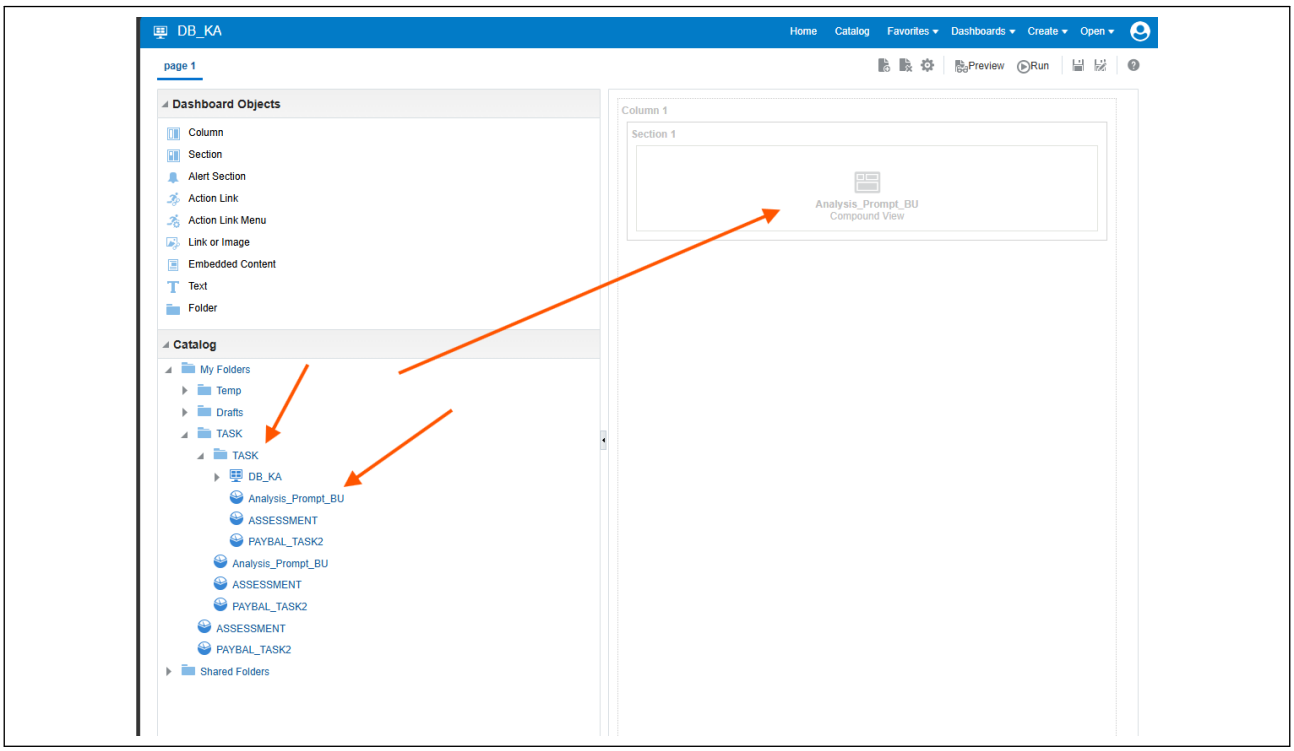

3. Add the content (categorize in sections)

9. From the **Catalog** pane (bottom left) open My Folders > TASK > TASK.

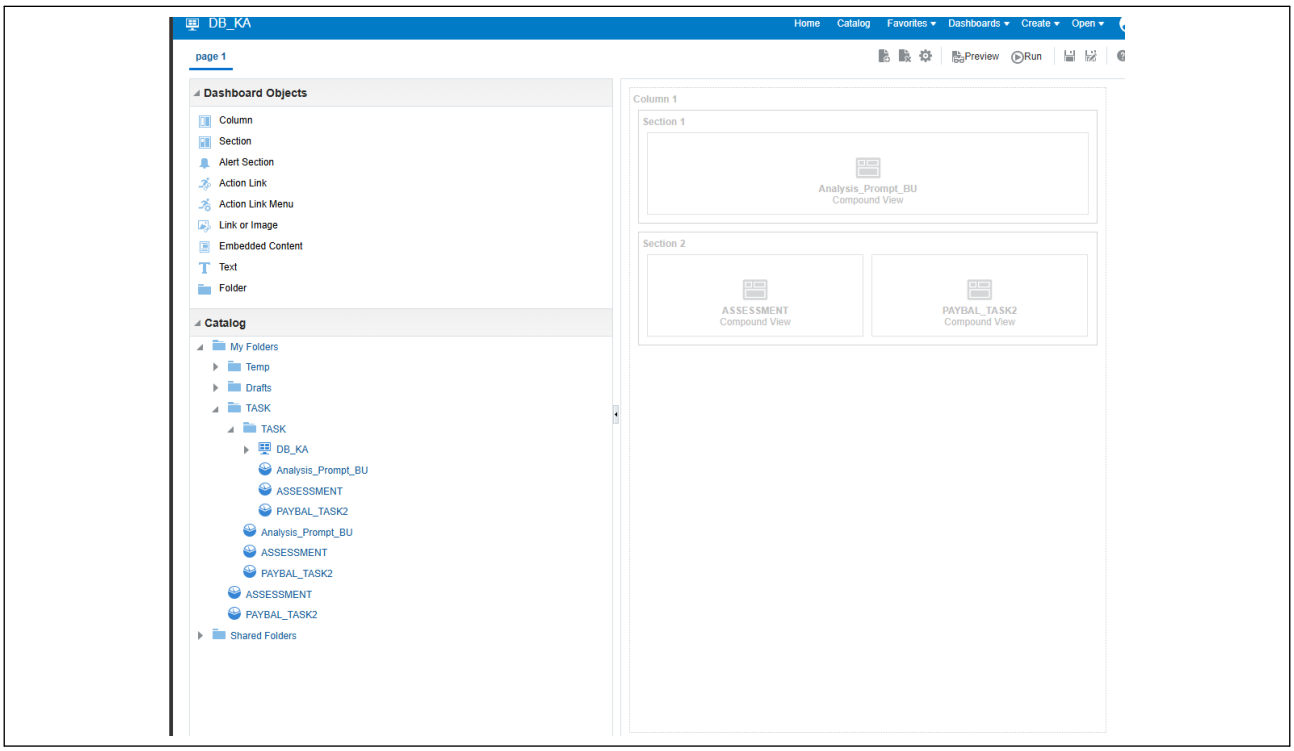

10. Drag **Analysis_Prompt_BU** into **Section 1** of **Column 1**.

11. From **Dashboard Objects** drag a new **Section** under it (Section 2), then drag **ASSESSMENT** and **PAYBAL_TASK2** into Section 2 side by side.

12. (Optional) Add more pages with the **Add Dashboard Page** icon to group reports by category.

Drag Analysis_Prompt_BU from the Catalog into Section 1

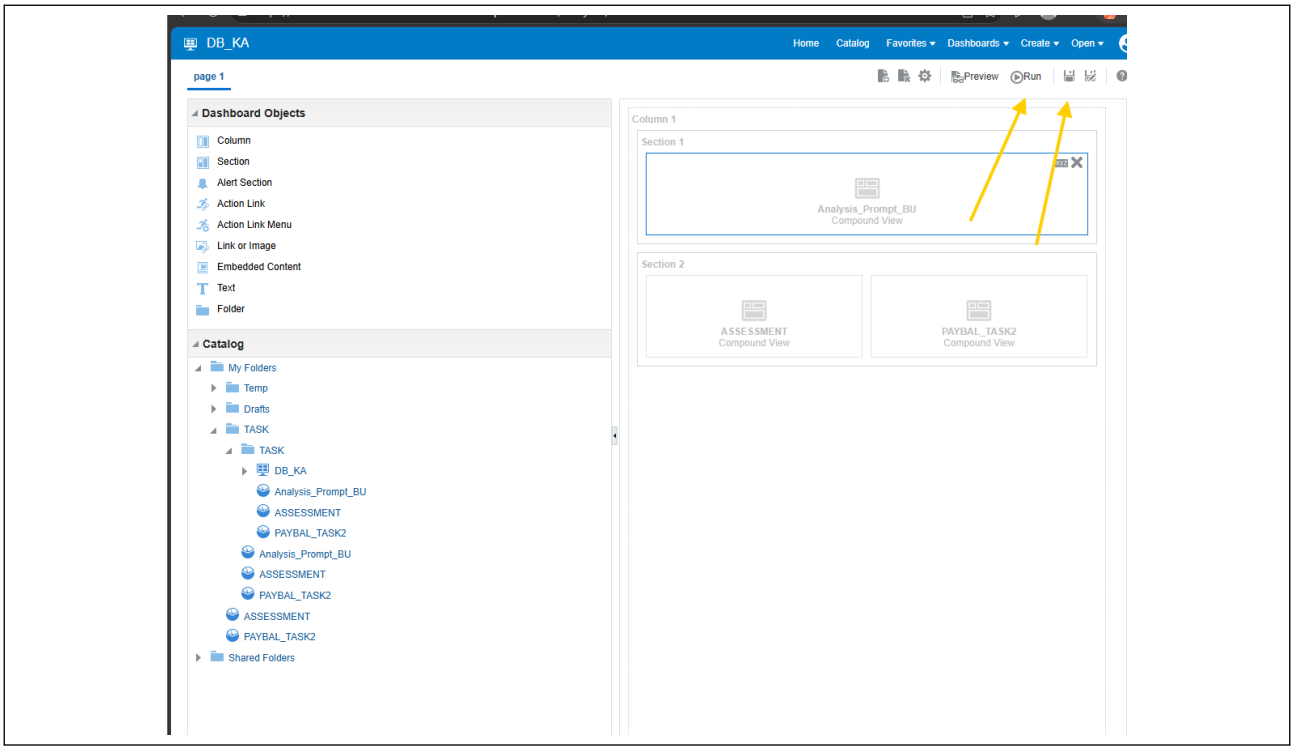

Section 1 = Analysis_Prompt_BU, Section 2 = ASSESSMENT + PAYBAL_TASK2

4. Save and Run

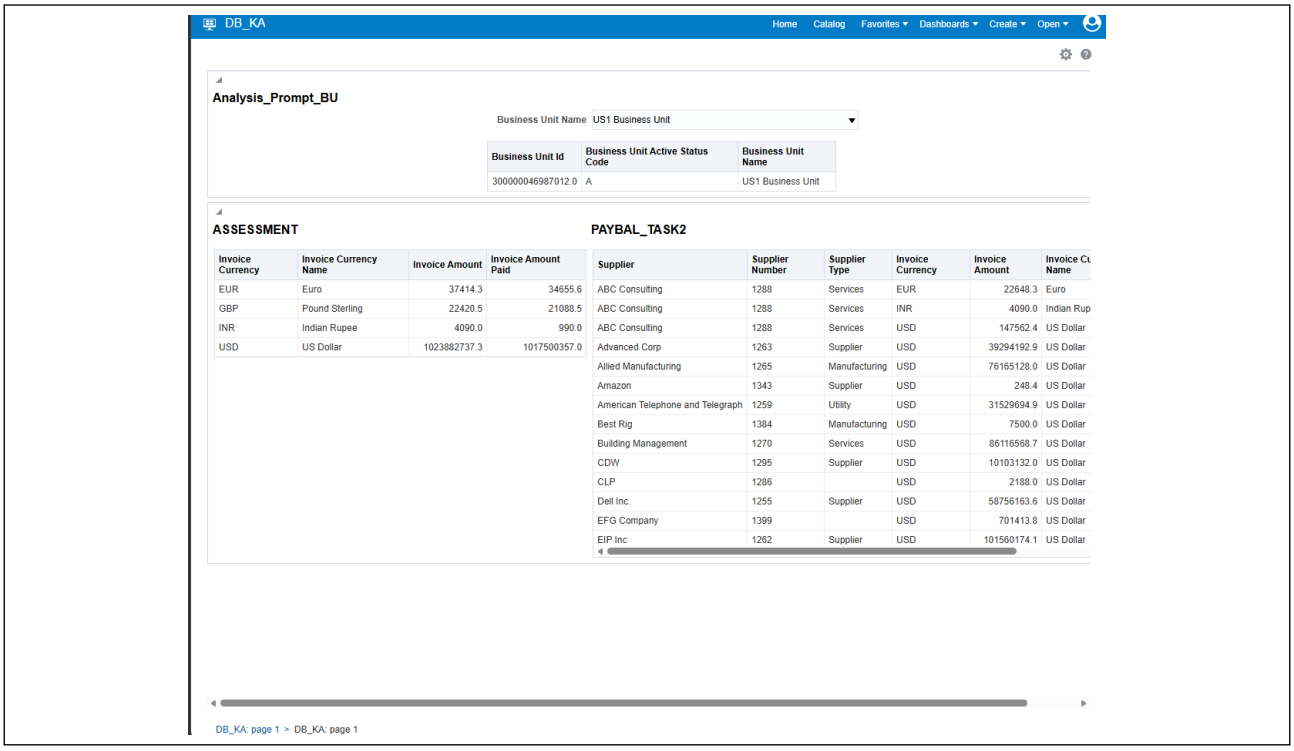

13. Click the **Save** icon, then **Run** (top right).

14. Check every analysis loads and the Business Unit drop-down works.

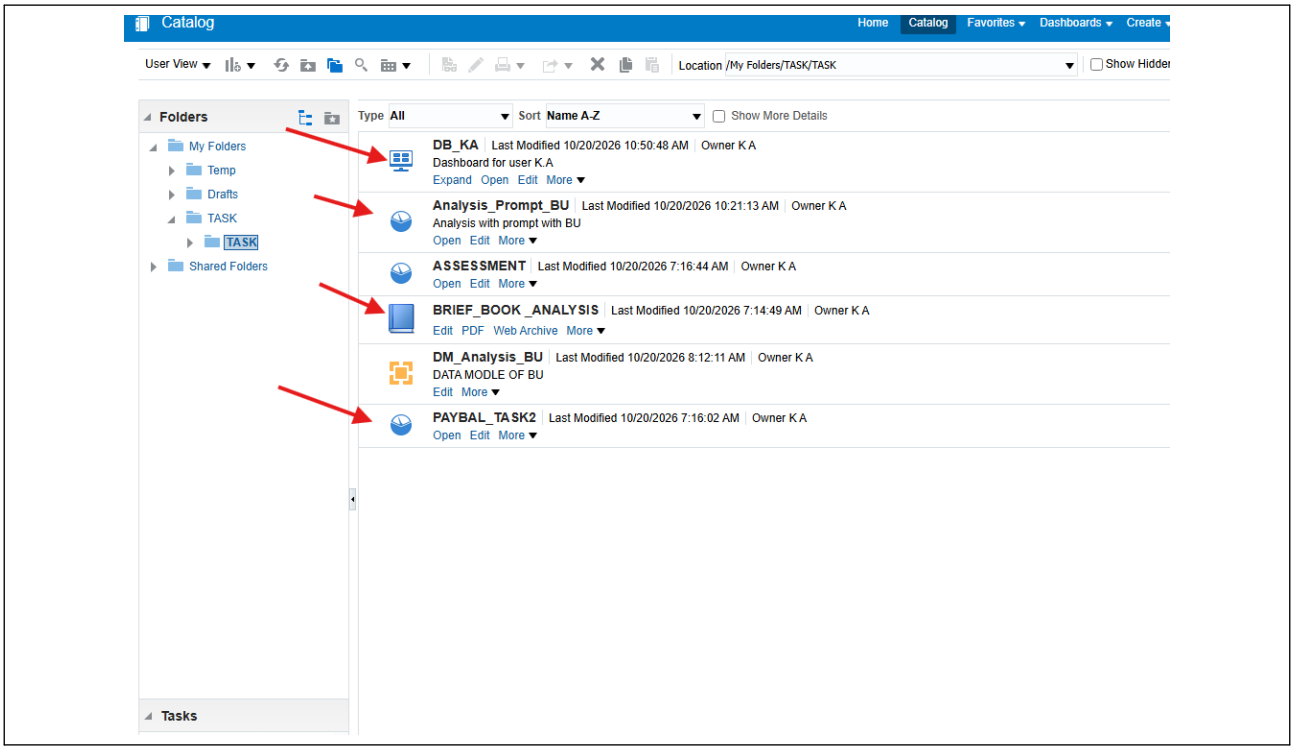

15. In the Catalog, **DB_KA** appears with the dashboard icon (Expand / Open / Edit / More).

Save and Run buttons

DB_KA running

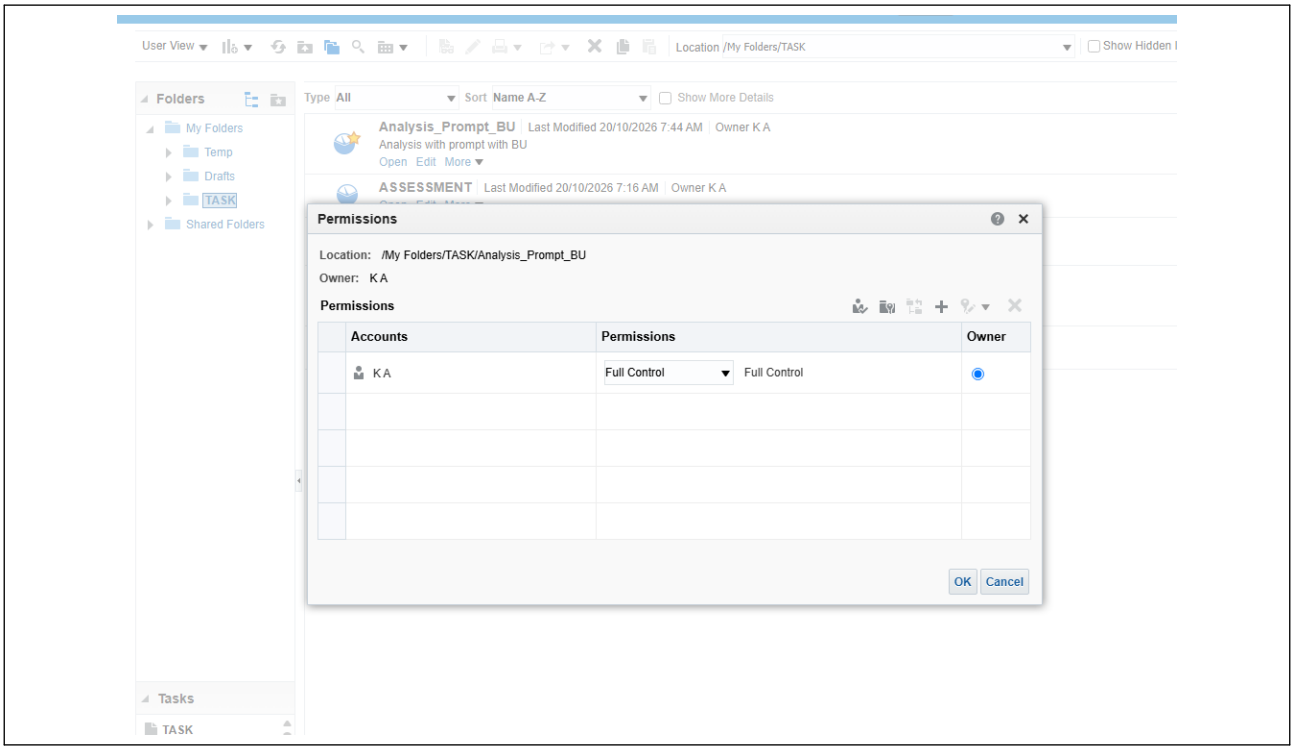

Catalog: DB_KA, analyses, briefing book, data model

5. Export the Dashboard (the file will be downloaded)

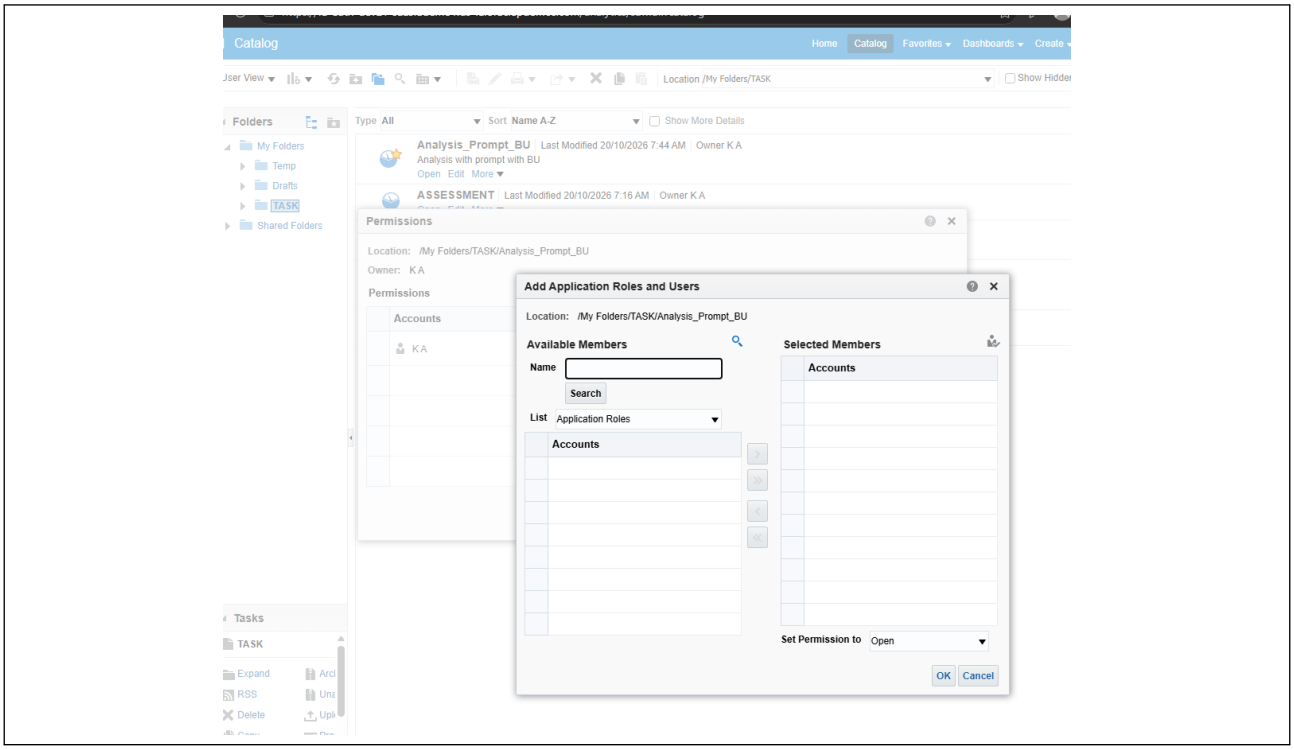

16. While running, click the **gear icon (Page Options)**, top right.
17. Choose **Export to Excel** > **Export Current Page** / **Export Entire Dashboard**, or **Print** > **Printable PDF**.
18. The file is downloaded to your PC.

6. Security - give permission (Owner) to another user

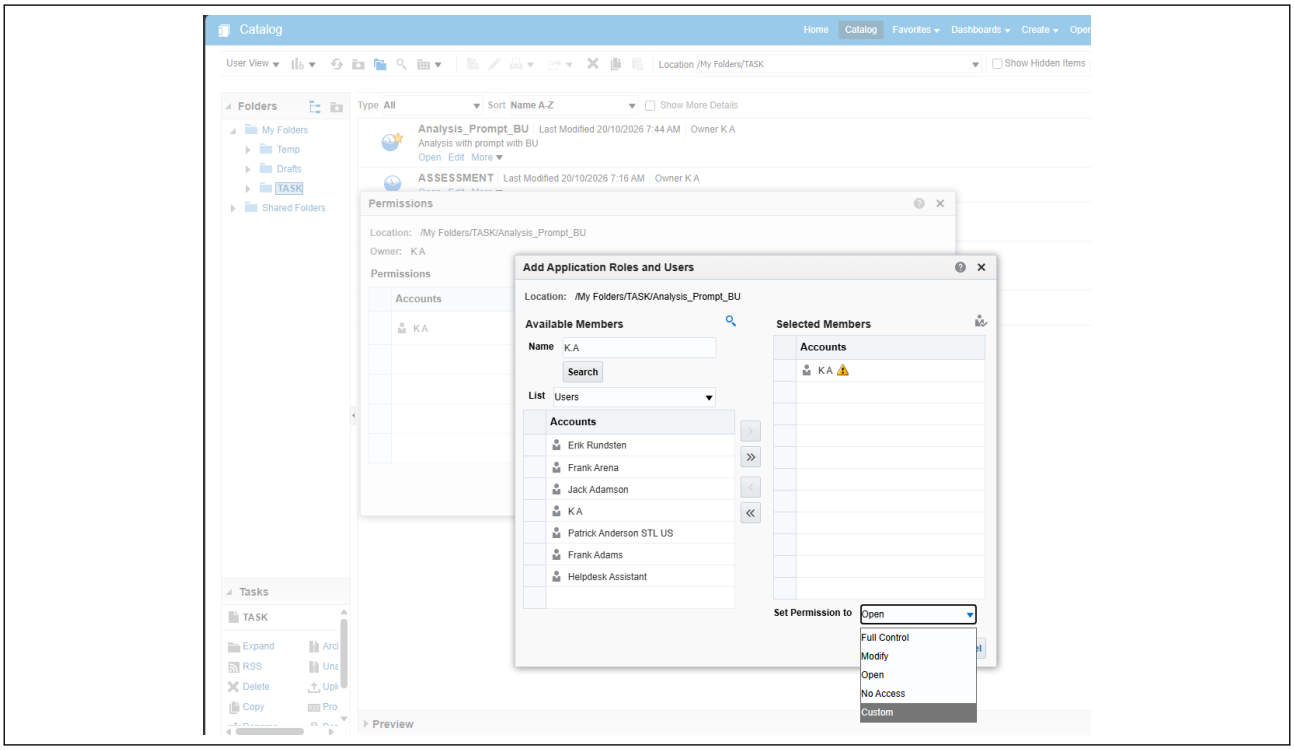

19. In the Catalog (My Folders > TASK) click **More** under your object > **Permissions** (or select it and click **Permissions** in the Tasks pane). You (K A) have **Full Control** and the **Owner** radio button.
20. Click the **+** icon. The **Add Application Roles and Users** window opens.
21. Change **List** from *Application Roles* to **Users**, type the user name in **Name** and click **Search**.
22. Select the user in **Available Members** and click **>** to move them to **Selected Members**.
23. In **Set Permission to** choose **Full Control**, **Modify**, **Open**, **No Access** or **Custom** > **OK**.
24. Back in Permissions, to make that user the **Owner** select the **Owner** radio button on their row > **OK**.
25. Do this for each object type: **Analysis**, **Data Model**, **Report** and **Dashboard**.

Permissions window - K A is Owner with Full Control

Add Application Roles and Users - List = Application Roles by default

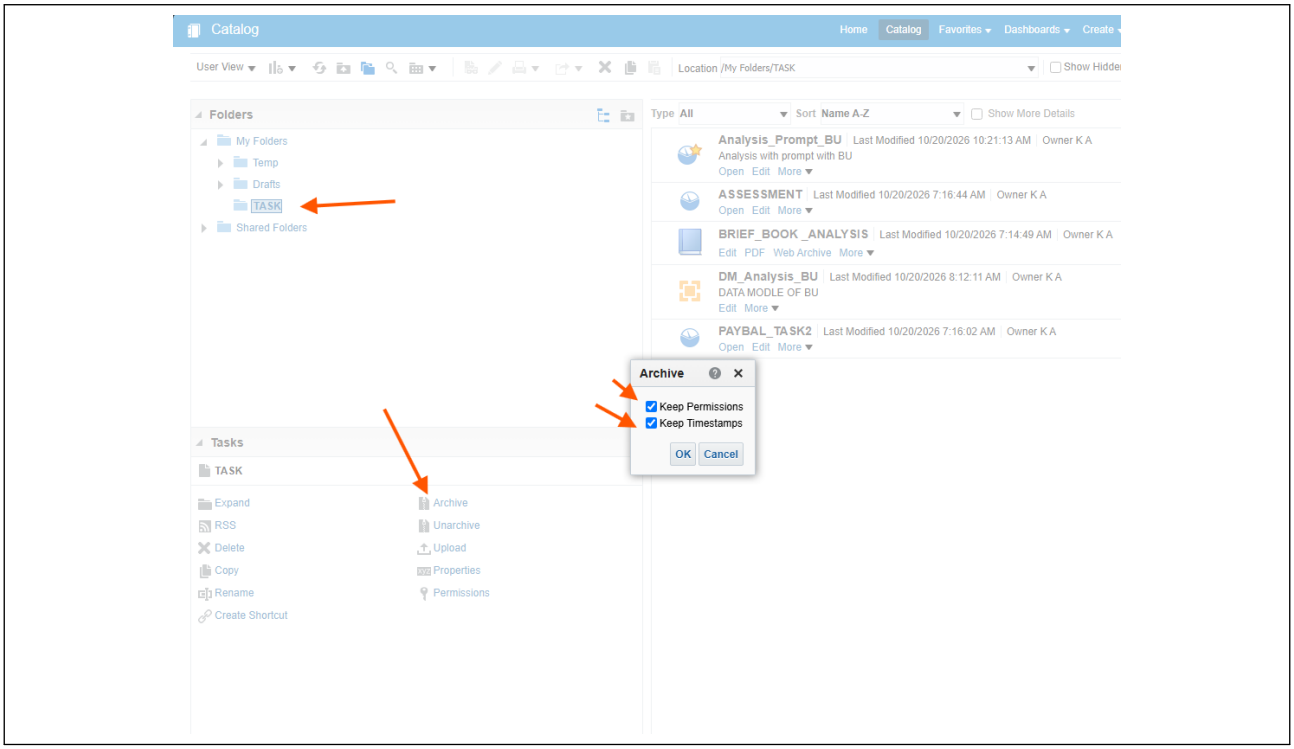

List = Users, Search, move the user to Selected Members, choose Set Permission to

7. Archive the folder (Catalog file)

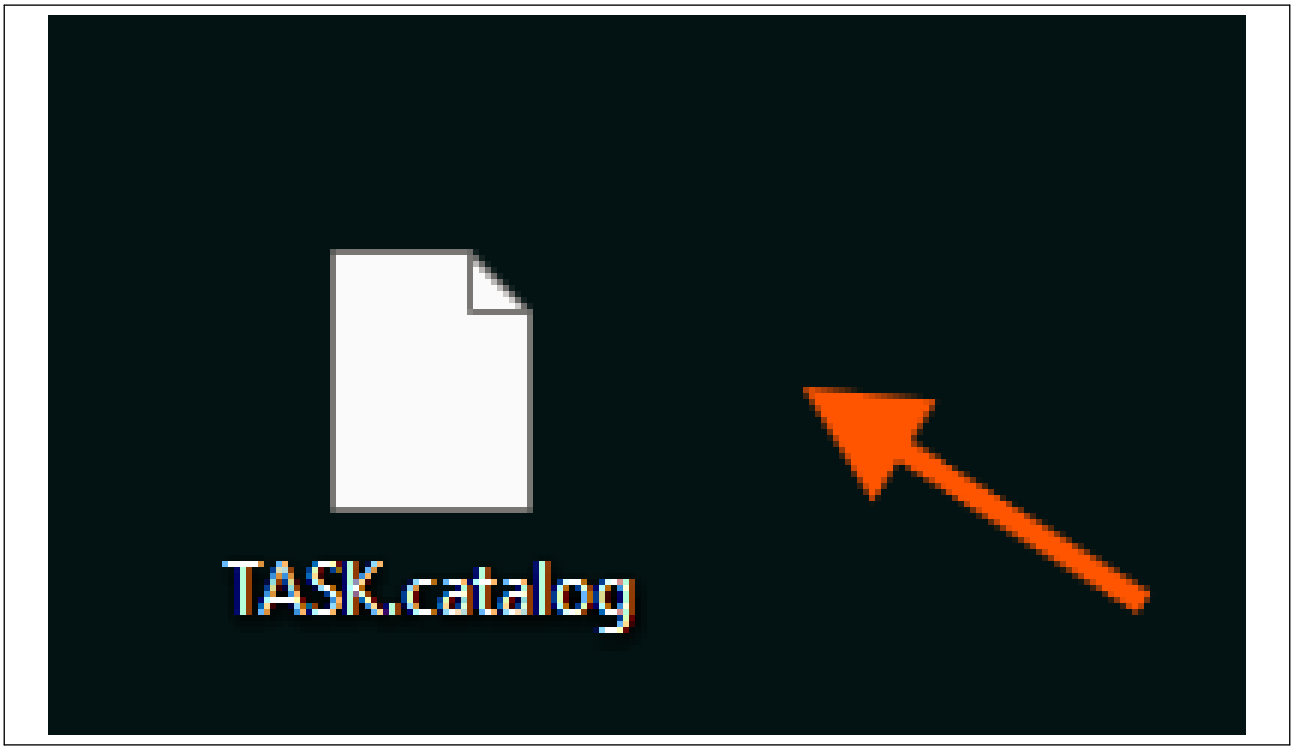

26. In **Folders** select the **TASK** folder.

27. In the **Tasks** pane (bottom left) click **Archive**.

28. Tick **Keep Permissions** and **Keep Timestamps** > **OK**. The file **TASK.catalog** is downloaded.

TASK > Tasks > Archive > Keep Permissions + Keep Timestamps

The downloaded TASK.catalog file

8. Unarchive (give it to another user)

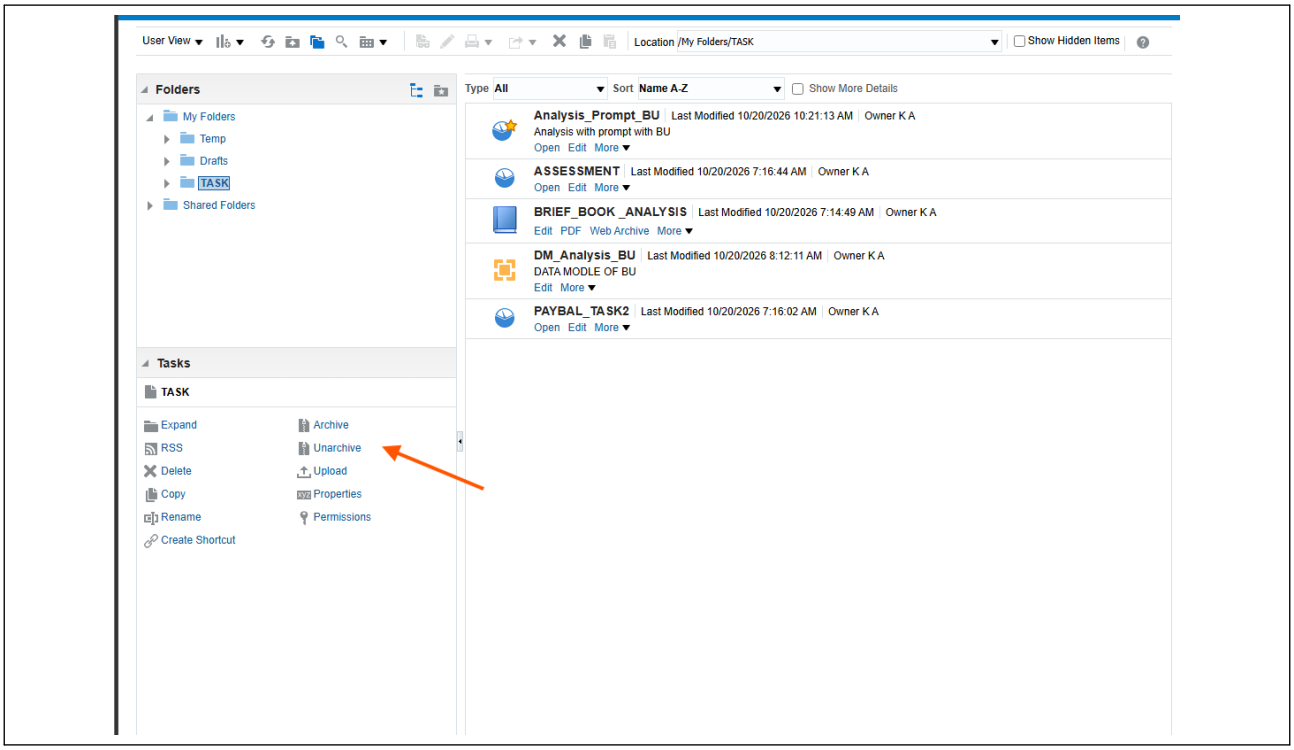

29. Log in as the **other user** (or yourself to test). **My Folders** opens by default.

30. Select the target folder > Tasks pane > **Unarchive**.

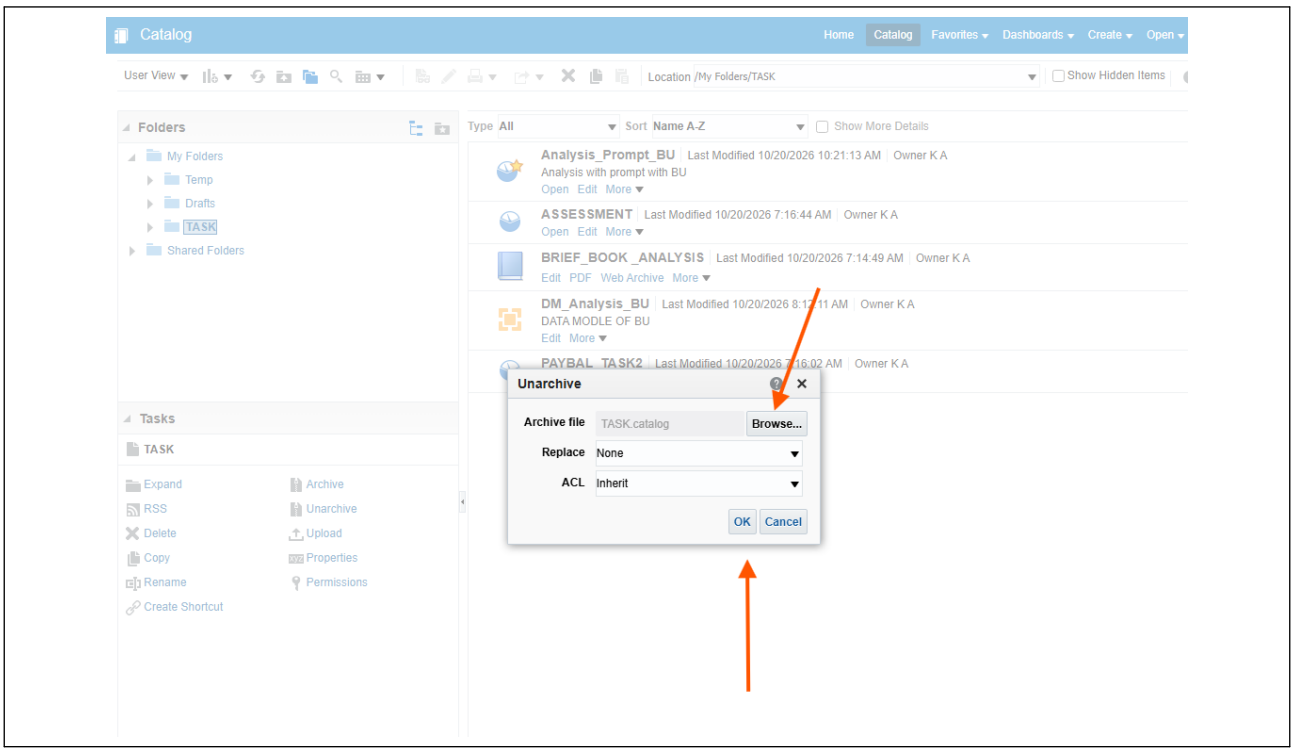

31. Click **Browse...** > select **TASK.catalog**, **Replace** = None, **ACL** = Inherit > **OK**.

32. Message: **Unarchive request is completed** > **OK**. A new **TASK** folder with all objects appears.

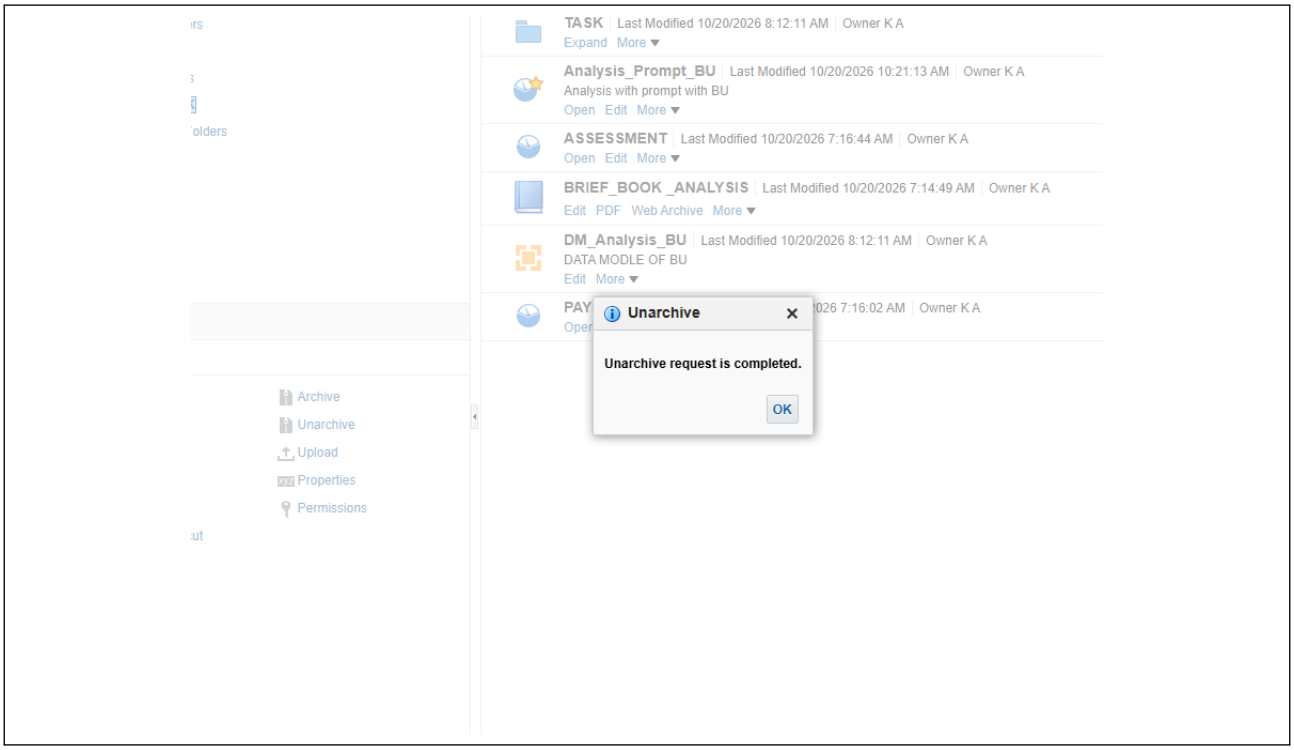

33. Move the analyses / reports where needed, **Save** and **Run** the dashboard.

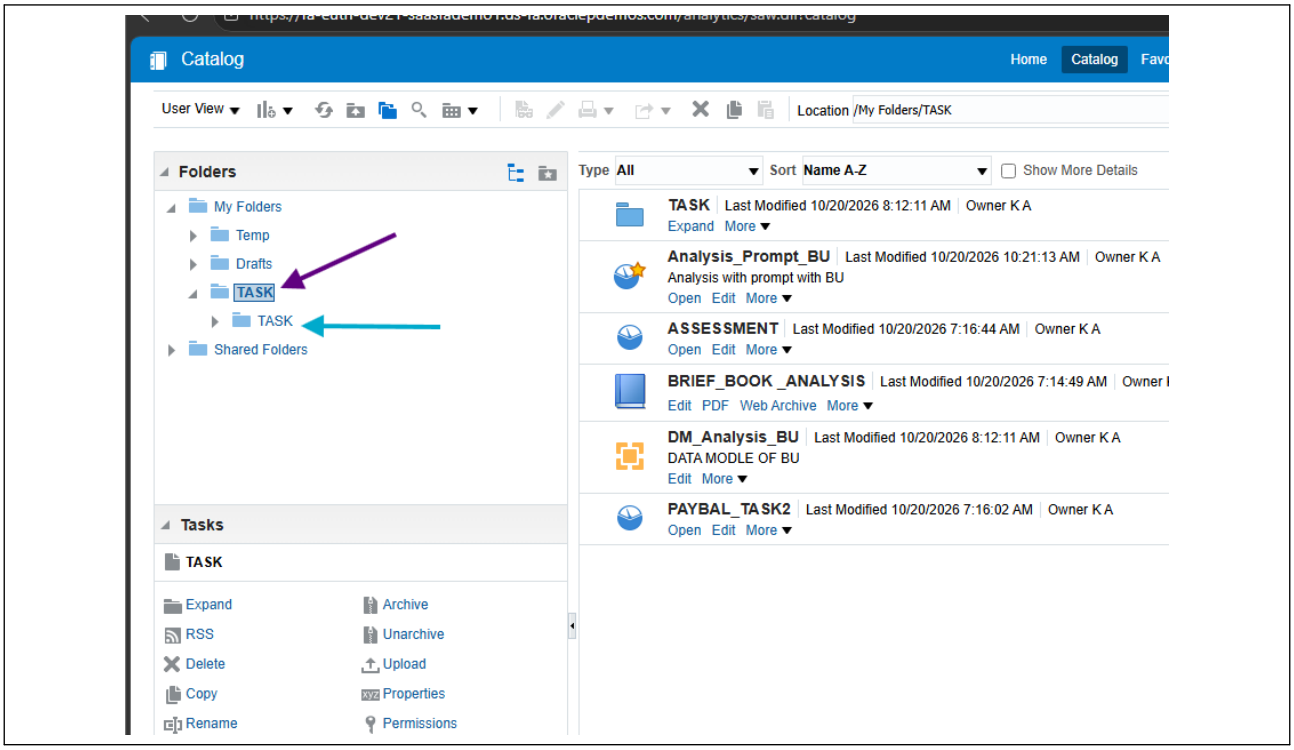

Tasks > Unarchive

Unarchive: Browse TASK.catalog

Unarchive request is completed

Result: TASK > TASK folder

Expected result: Dashboard **DB_KA** showing Analysis_Prompt_BU, ASSESSMENT and PAYBAL_TASK2, exportable, and the folder shared as TASK.catalog.

Tips: • Finish Tasks 1-3 first - the dashboard only shows objects that already exist in the Catalog.
• To edit later: open the dashboard > gear icon > **Edit Dashboard**.
