CREATE A USER

- Tools
  - Security Console
    - Users → ADD USER ACCOUNT
      - First Name: A
      - Last Name: ANCHAN
      - Username: A.ANCHAN
      - Password:

      <SAVE and CLOSE>
  - Sign out
- LOGIN with your New USERNAME
  - Username: A.ANCHAN
  - Password:

  >>>> DO NOT SEE ANY ROLES as this user is NOT ASSIGNED any ROLES

- LOGIN as A.A
- ASSIGN ROLES TO User A.ANCHAN
  - Employee ← Abstract ROLE
  - IT Security Manager ← Admin ROLE

  <SAVE and CLOSE>

- LOGIN as A.ANCHAN

  >>>> View all ROLES assigned to this New USER

- Password Policy:
- User Category: DEFAULT
  - Set the required category based on the requirement from Client.
  - SAVE & CLOSE
- Tools
  - Reports and Analytics
    - BIP Reports
    - OTBI Reports

  You can design BIP Reports and OTBI Analysis & Dashboards in Oracle Fusion Cloud.

MY LAB STEPS – KAWTHER ALI **Security Console: Create User & Assign Roles**

LAB SUMMARY

- Environment: Oracle Fusion Cloud – Vision demo (fa-euth-dev37-saasfademo1)
- Admin user: **A.A** / Fusion@2026 (has IT Security Manager role)

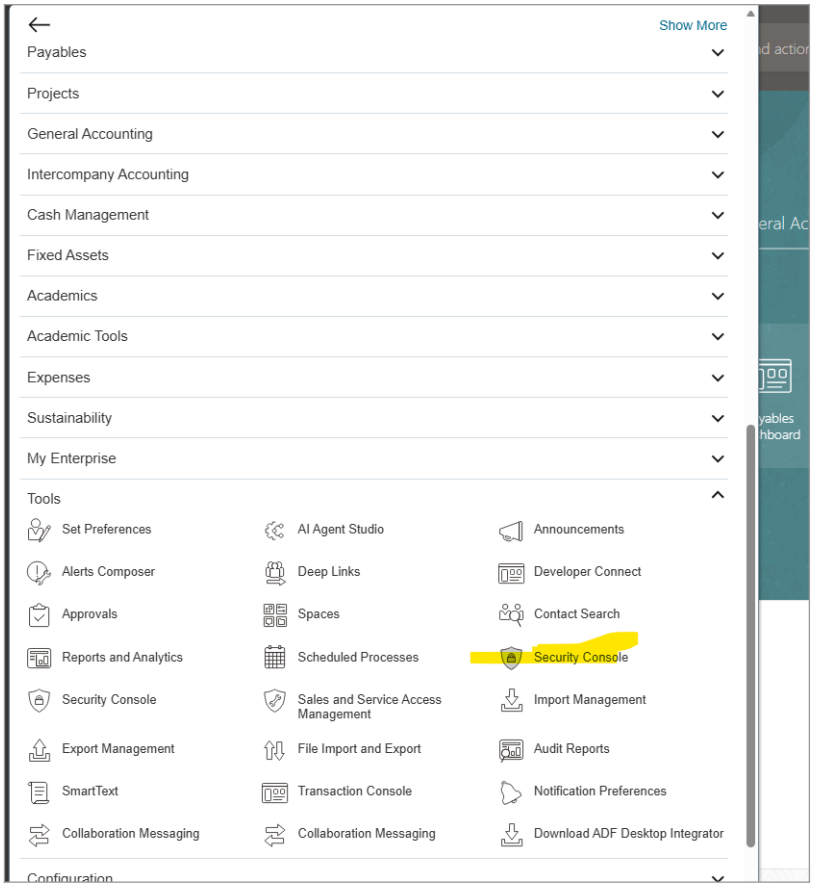

- New user created: **KAWTHER.ALI** / 91711740
- Roles assigned: **Employee** (ORA_PER_EMPLOYEE_ABSTRACT) + **IT Security Manager** (ORA_FND_IT_SECURITY_MANAGER_JOB)

STEP 1: Login to Fusion as the Admin user

- Username: **A.A**
- Password: **Fusion@2026**

STEP 2: Open the Security Console

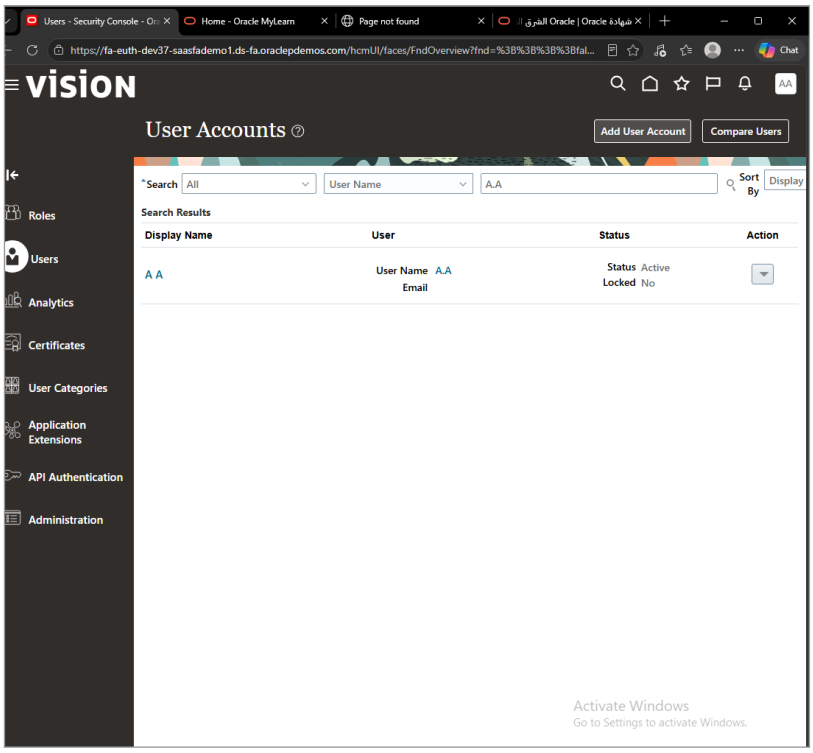

- Click the Navigator (☰) at the top left
- Tools
    - **Security Console**

Screenshot 1: Navigator > Tools > Security Console

STEP 3: Check the Admin user A.A and its roles

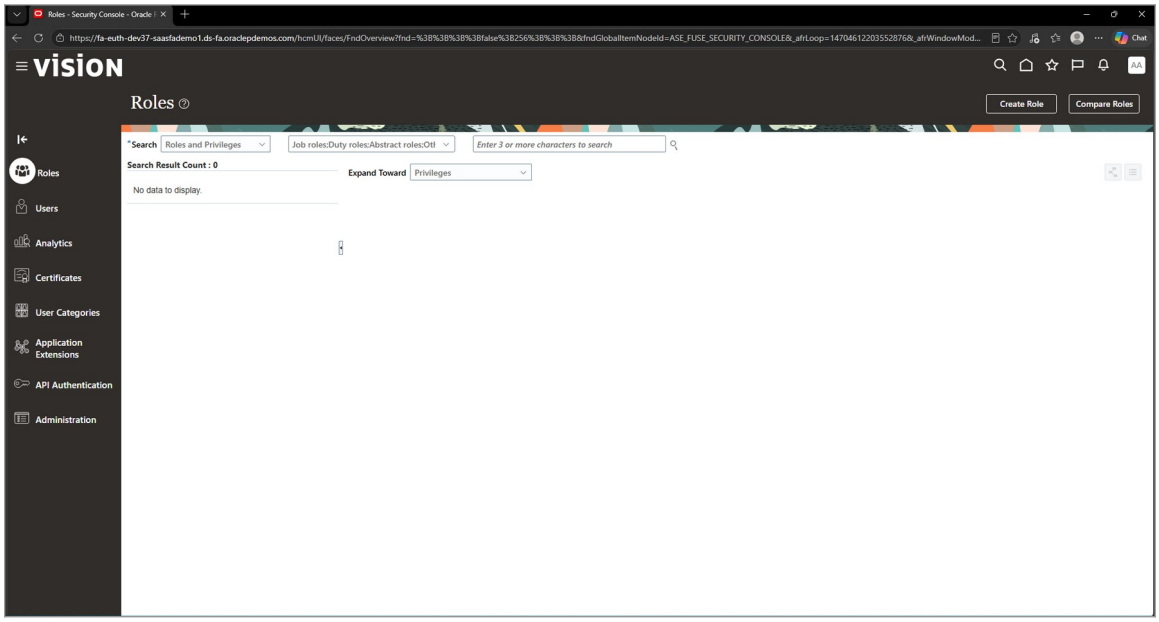

- Security Console > **Users**
    - Search: All > User Name > **A.A** > click Search
    - Click **A A** to view the roles assigned to the admin user

Screenshot 2: User Accounts – search result for A.A (Active, Not Locked)

STEP 4: Search for the IT Security Manager role

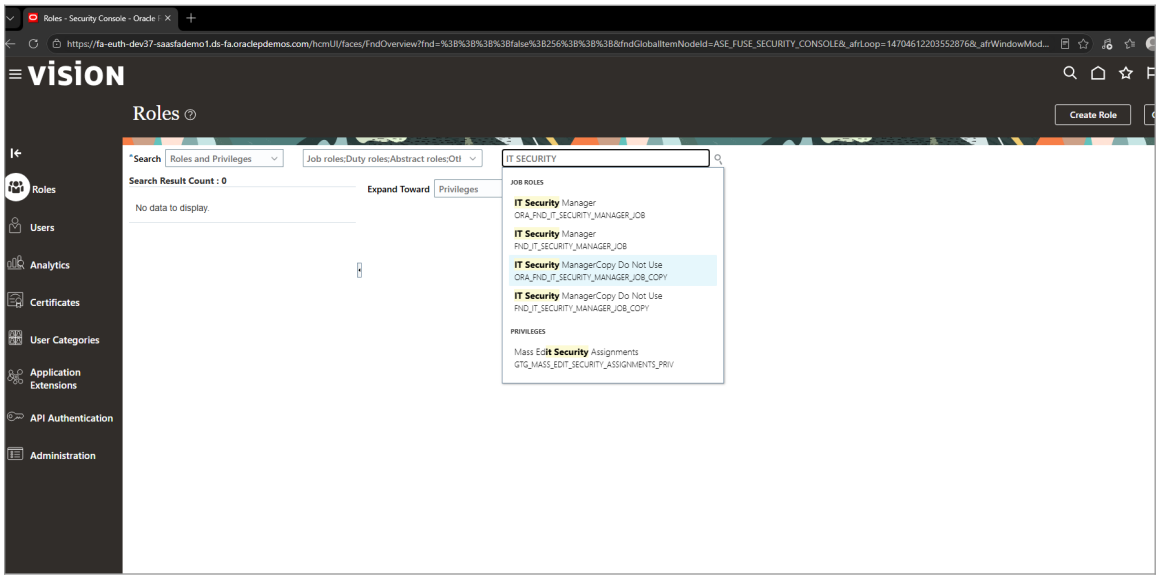

- Security Console > **Roles**
  - Search: Roles and Privileges > Job roles; Duty roles; Abstract roles
  - Type at least **3 characters** (e.g. IT SECURITY)

Screenshot 3: Roles page – "Enter 3 or more characters to search"

- The list shows 4 options. **ALWAYS SELECT ORA_**:

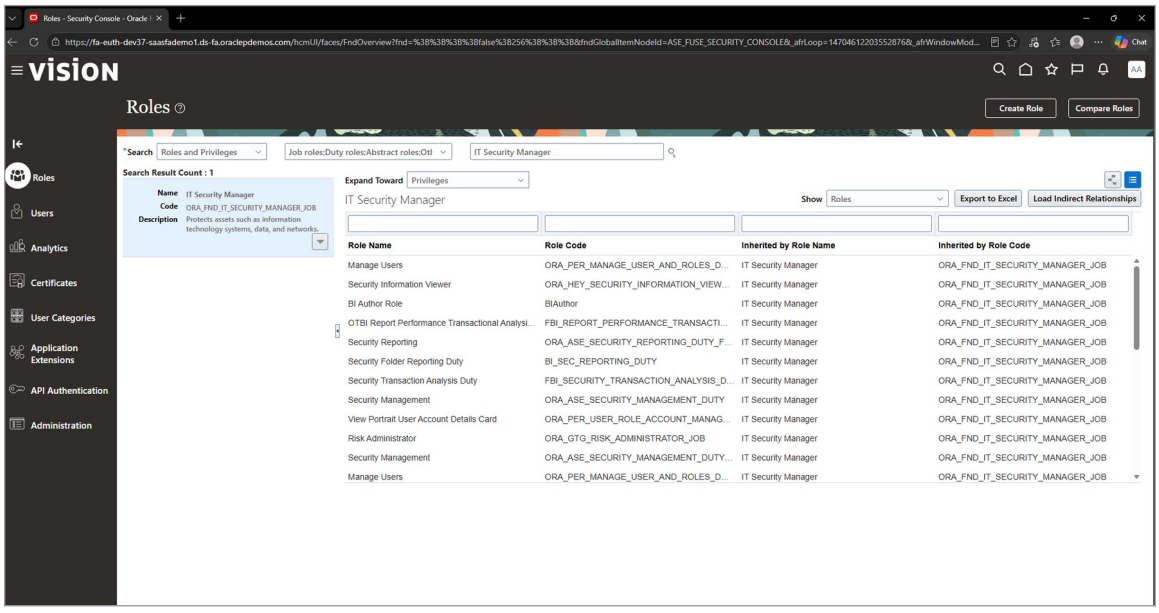

- IT Security Manager – **ORA_FND_IT_SECURITY_MANAGER_JOB** ✔️ (use this one)
- IT Security Manager – FND_IT_SECURITY_MANAGER_JOB ✘
- IT Security ManagerCopy Do Not Use – ORA_..._COPY / FND_..._COPY ✘ (DO NOT USE COPY)

Screenshot 4: Search results – select ORA_FND_IT_SECURITY_MANAGER_JOB, not the Copy

➢ Expand Toward: **Privileges**, Show: **Roles** → view the roles inherited by IT Security Manager:

- Manage Users, Security Management, Security Reporting, Security Information Viewer
- BI Author Role, OTBI Report Performance, Security Folder Reporting Duty, Risk Administrator, …

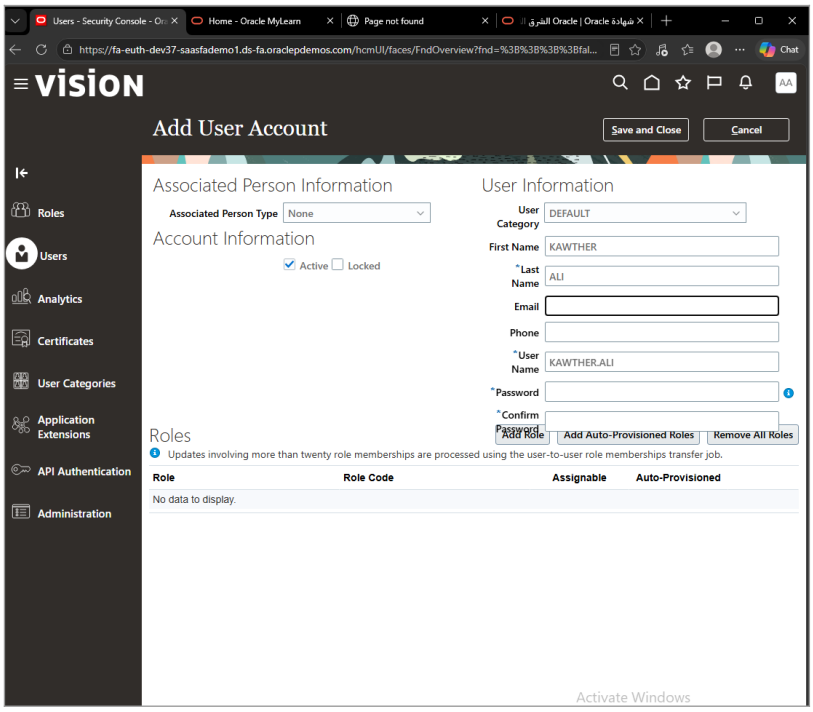

Screenshot 5: IT Security Manager (ORA_FND_IT_SECURITY_MANAGER_JOB) – inherited roles

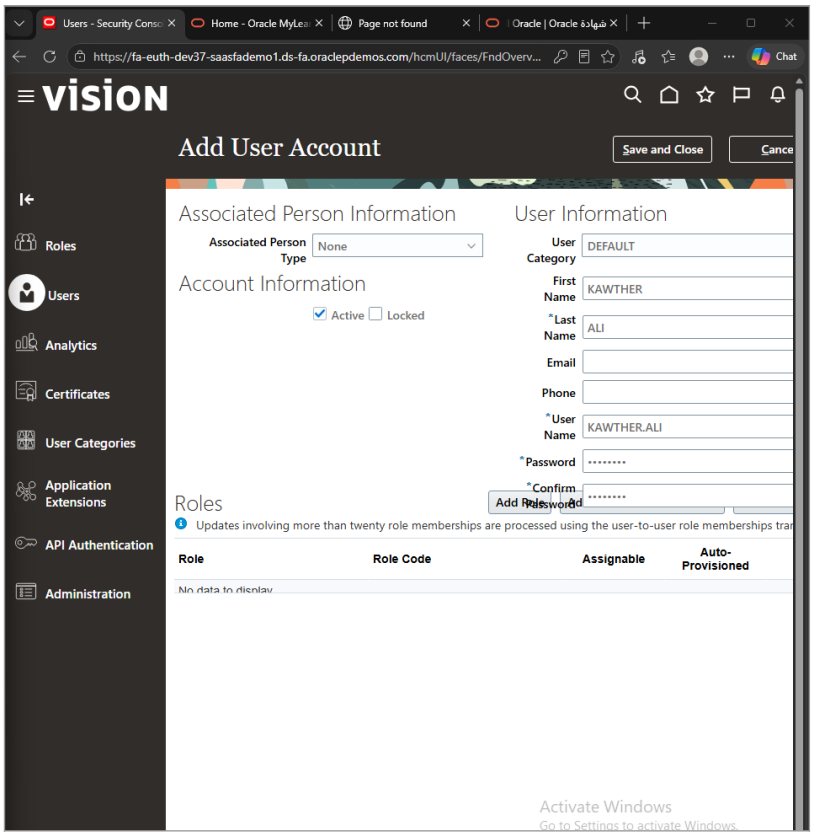

Note: IT Security Manager includes **BI Author Role**, so this user can also use Reports and Analytics.

STEP 5: Create my new user KAWTHER.ALI

- Security Console > **Users** > **Add User Account**
  - Associated Person Type: **None**
  - Active: ✔️ Locked: (unchecked)
  - User Category: **DEFAULT**
  - First Name: **KAWTHER**
  - Last Name: **ALI**
  - Email / Phone: (left empty)
  - User Name: **KAWTHER.ALI**
  - Password / Confirm Password: **91711740**
  - Roles: none yet ("No data to display")

Screenshot 6: Add User Account – user details entered

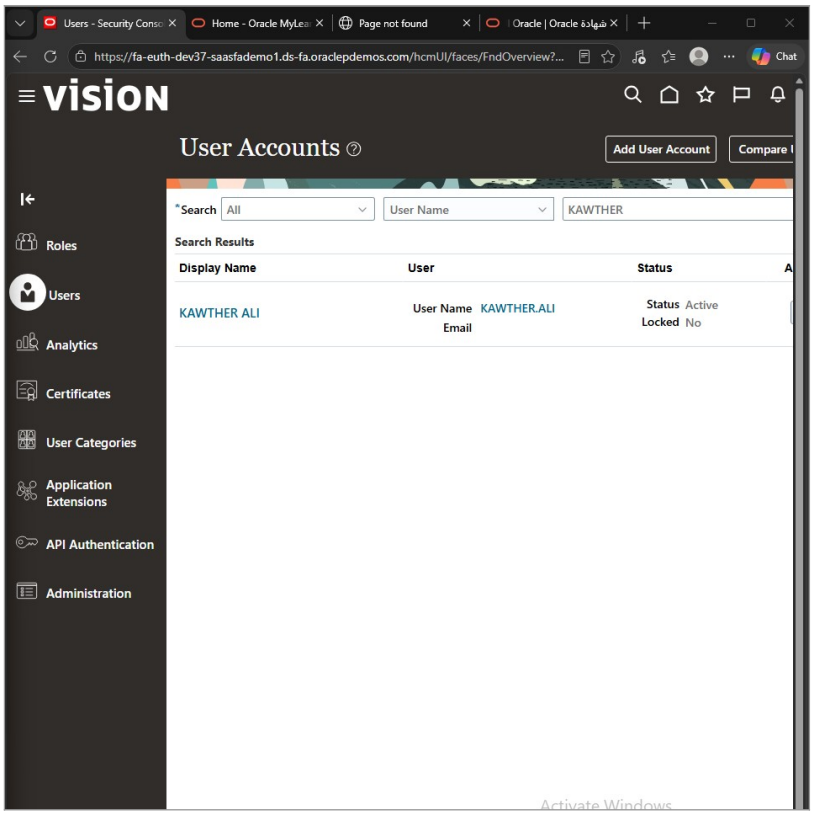

Screenshot 7: Add User Account – password entered, then Save and Close

- Click **Save and Close**

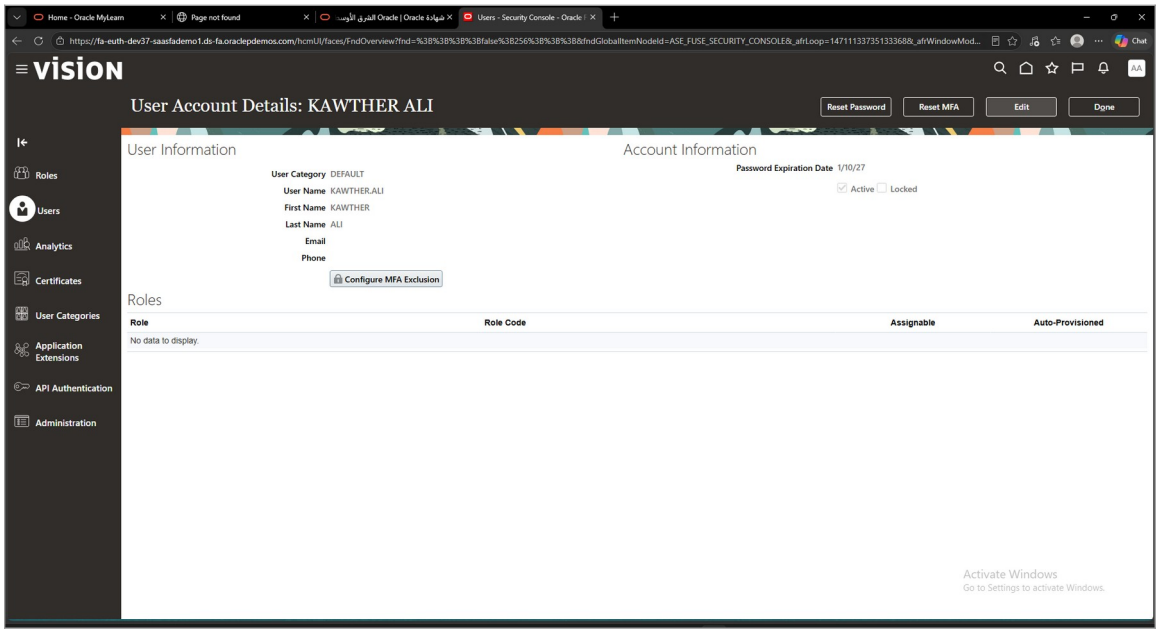

STEP 6: Verify the new user

- Users > Search: User Name > **KAWTHER** > Search
  - Result: KAWTHER ALI – User Name KAWTHER.ALI – Status **Active** – Locked **No**

Screenshot 8: User Accounts – KAWTHER.ALI created successfully

- Click **KAWTHER ALI** → User Account Details
  - Password Expiration Date: 1/10/27
  - Roles: **No data to display** (no roles assigned yet)

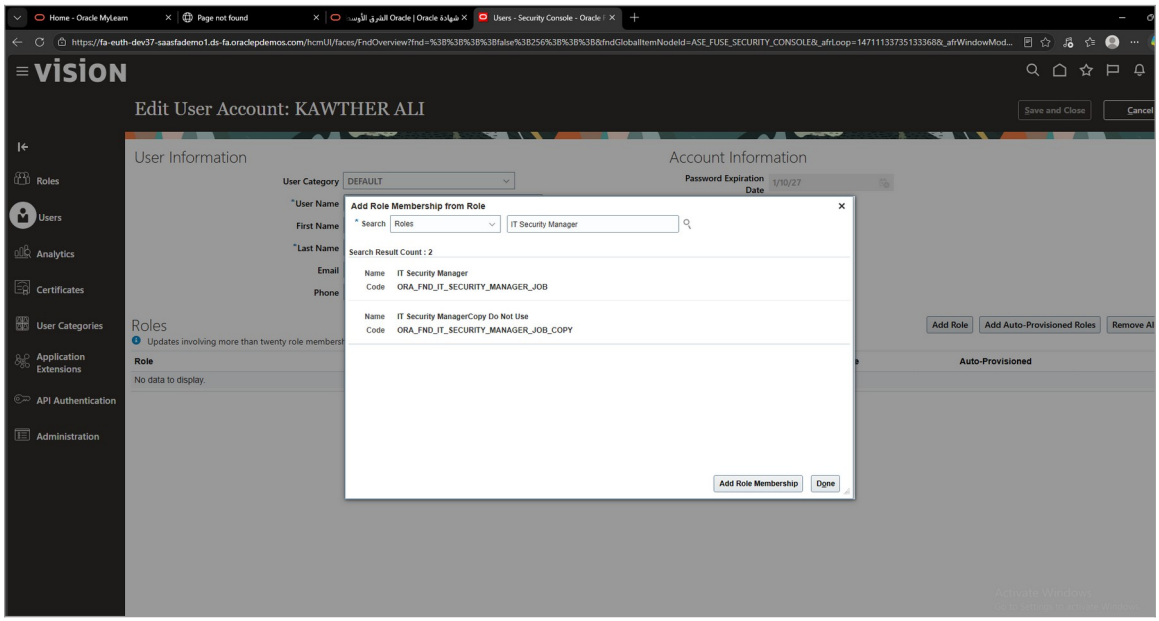

Screenshot 9: User Account Details – no roles assigned

STEP 7: Login with the new user (before roles)

- Sign out from A.A
- Login: **KAWTHER.ALI** / **91711740**
  - >>>> I do NOT see any roles / work areas because this user is NOT assigned any roles
- Sign out

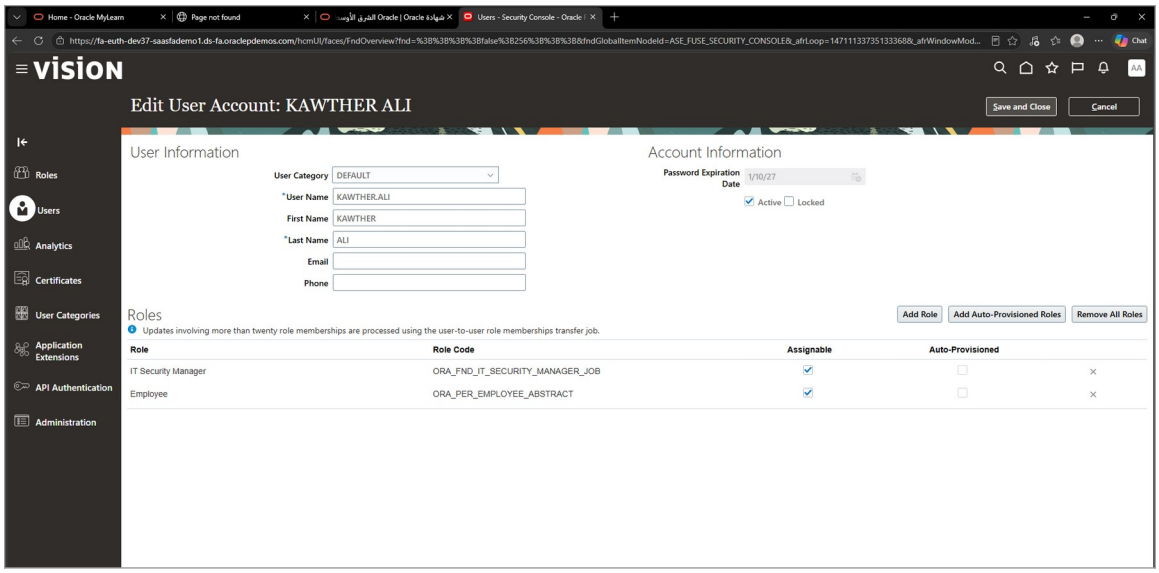

STEP 8: Login as A.A and assign roles to KAWTHER.ALI

- Login as **A.A** / Fusion@2026 > Tools > Security Console > Users
- Search **KAWTHER** > click **KAWTHER ALI** > click **Edit**
- Click **Add Role** → "Add Role Membership from Role"
  - Search: Roles > **IT Security Manager** > Search
  - Select **ORA_FND_IT_SECURITY_MANAGER_JOB** (NOT the Copy Do Not Use) > **Add Role Membership**

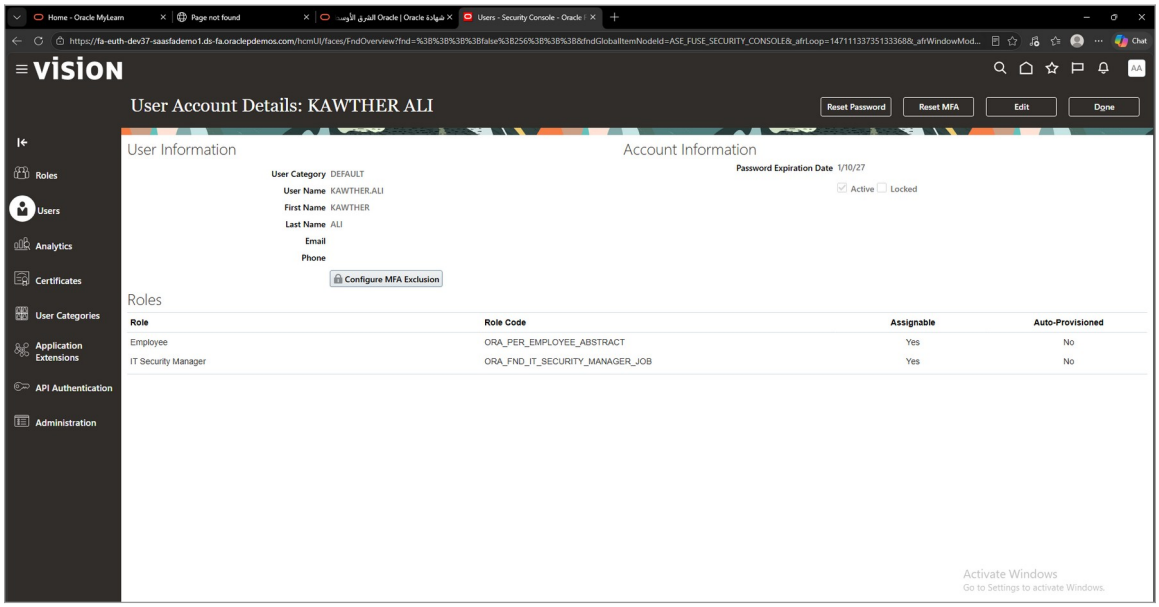

Screenshot 10: Add Role Membership – choose ORA_FND_IT_SECURITY_MANAGER_JOB

  - Search: Roles > **Employee** > select **ORA_PER_EMPLOYEE_ABSTRACT** > **Add Role Membership**
  - Click **Done**
- Both roles now appear in the Roles table (Assignable ✔️):
  - IT Security Manager – ORA_FND_IT_SECURITY_MANAGER_JOB (Job role / Admin role)
  - Employee – ORA_PER_EMPLOYEE_ABSTRACT (Abstract role)

Screenshot 11: Edit User Account – IT Security Manager and Employee added

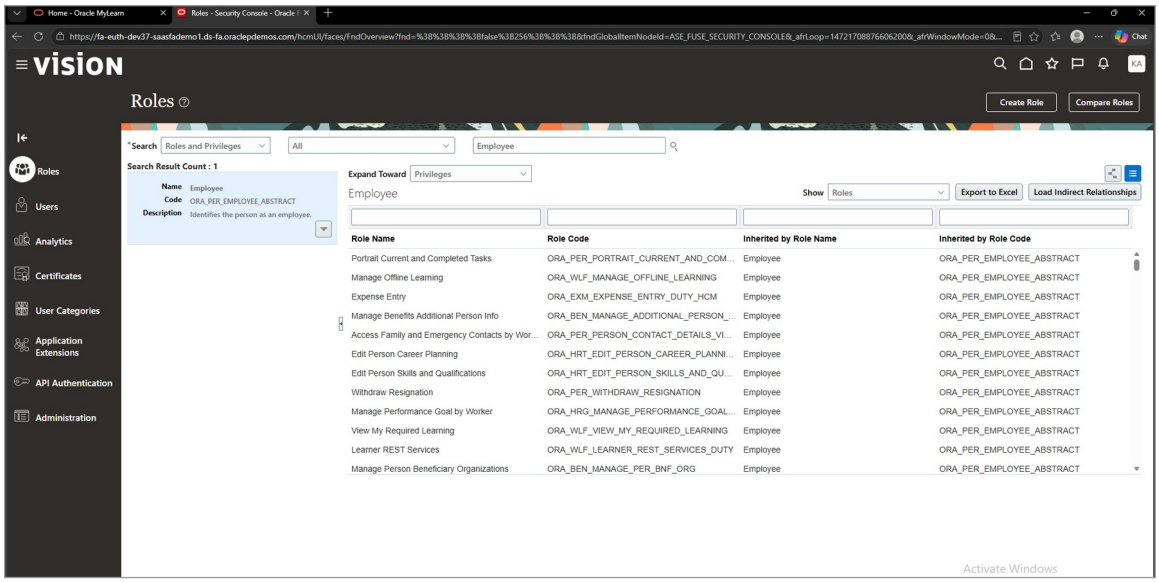

- Click **Save and Close**

Screenshot 12: User Account Details – KAWTHER ALI now has 2 roles

STEP 9: Review the Employee (Abstract) role

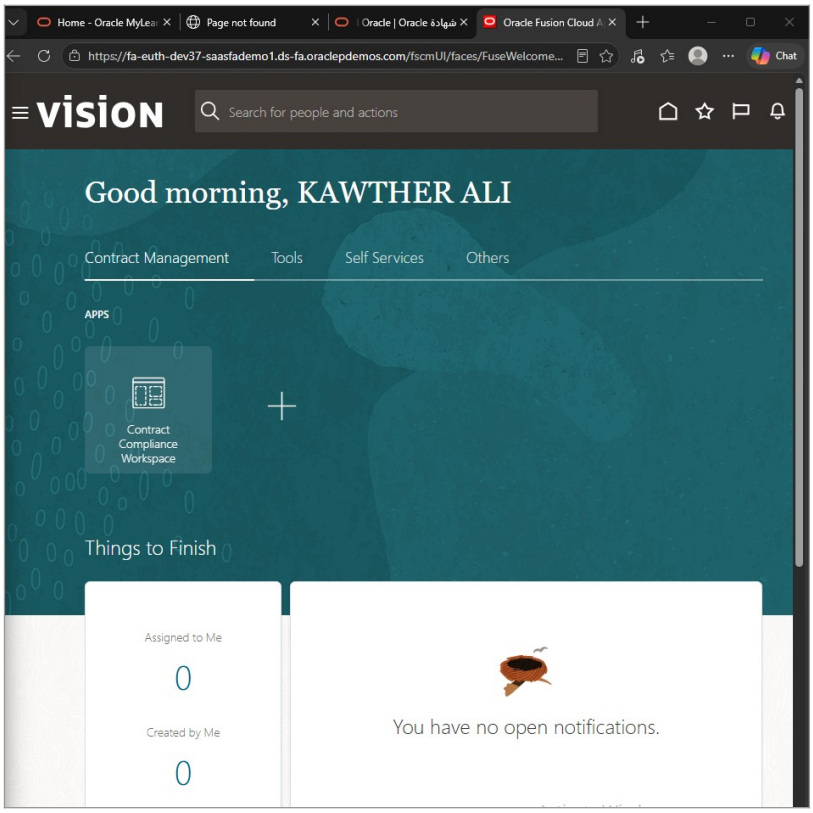

- Security Console > Roles > Search **Employee** > select ORA_PER_EMPLOYEE_ABSTRACT
  - Description: "Identifies the person as an employee."
  - Inherited roles include: Expense Entry, Manage Offline Learning, View My Required Learning, Withdraw Resignation, Manage Performance Goal by Worker, Edit Person Skills and Qualifications, …

Screenshot 13: Employee (ORA_PER_EMPLOYEE_ABSTRACT) – inherited roles

STEP 10: Login as KAWTHER.ALI (after roles)

- Sign out from A.A
- Login: **KAWTHER.ALI / 91711740**
  - >>>> "Good morning, KAWTHER ALI" – I can now see the work areas from my assigned roles (Contract Management, Tools, Self Services, Others)
  - Tools tab is available → Security Console, Reports and Analytics

Screenshot 14: Home page for KAWTHER.ALI after roles were assigned

STEP 11: Notes

- Roles: always use **ORA_** roles – DO NOT USE COPY roles
- Role types: Job roles, Duty / Data roles, Abstract roles, Privileges
- User Category: **DEFAULT** – set the category based on the client requirement (controls the Password Policy)
- Security Console is available for admin users (role: **IT Security Manager**)
- Reports and Analytics (BIP & OTBI) is available by default for users with BI roles (BI Author, BI Consumer, …)
