

Conditional Formatting – Master-Detail Table

Applies background color to rows where SAL is greater than 2000, on the Master-Detail RTF template (KAWTHER_MASTER_DETAI_1).

1. Select the Field

1. Open the Master-Detail RTF template in Word.
2. In the detail table, click the **SAL** data cell (the row under the header, not the header itself).
3. Go to the **BI Publisher** tab → click **Conditional Format**.

2. Set the Condition

1. **General** → **Data field**: SAL, type **Number**.
2. Check **Apply to Entire Table Row**.
3. **Condition 1** → **Data field**: select **Greater than**.
4. In the value box next to it, type **2000** (do not pick a field name from the list).
5. Leave **Condition 2** empty.

3. Set the Format

1. Click **Format...** next to Condition 1.
2. Check **Background Color** → **Select** → choose a color (e.g. green) → **OK**.
3. Click **OK** on the Format window, then **OK** on the main Properties window.

4. Load Data and Preview

1. If the preview is blank, go to **Sample XML** and reload the matching XML data file for this template.
2. Click **PDF** or **HTML** under Preview to run the report.
3. Confirm rows with SAL > 2000 are highlighted and other rows are not.
4. Save the template (**Ctrl+S**), keeping the .rtf format.
