Create a Data Model Using Analysis

Goal: Create a **BI Publisher Data Model** based on your analysis **Analysis_Prompt_BU**, then a report based on the data model.

1. Log in and open the Catalog

1. Open the **Oracle Fusion** link. On the **Oracle Cloud Sign in** page enter **your username** (K.A) and **password** > **Next**.
2. Click the **Navigator** (three lines, top left) > **Tools** > **Reports and Analytics**.
3. Click **Browse Catalog** (top right). The **Oracle Transactional Business Intelligence** Catalog opens.
4. In **Folders** open **My Folders** > **TASK**. Save all your work in this folder.

2. Create the Data Model

5. Catalog > **Create** > under *Published Reporting* click **Data Model**.
6. On the **Diagram** tab click **+** (New Data Set) > choose **Analysis**.
7. In **New Data Set - Analysis** type **Name** = **DM_Analysis_BU**.
8. Click the search icon next to **Analysis** and select **/users/k.a/TASK/Analysis_Prompt_BU**.
9. **Time Out** is optional. Click **OK** - the data set with its columns appears on the diagram.

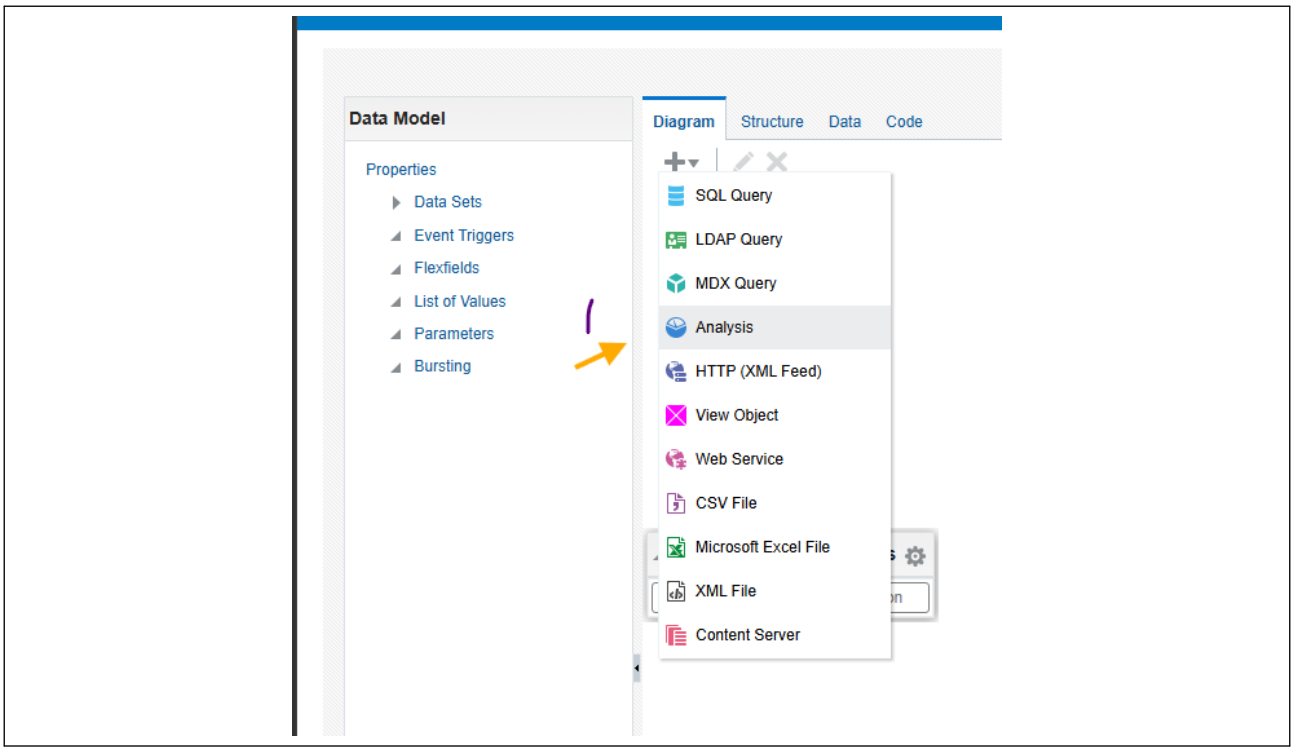

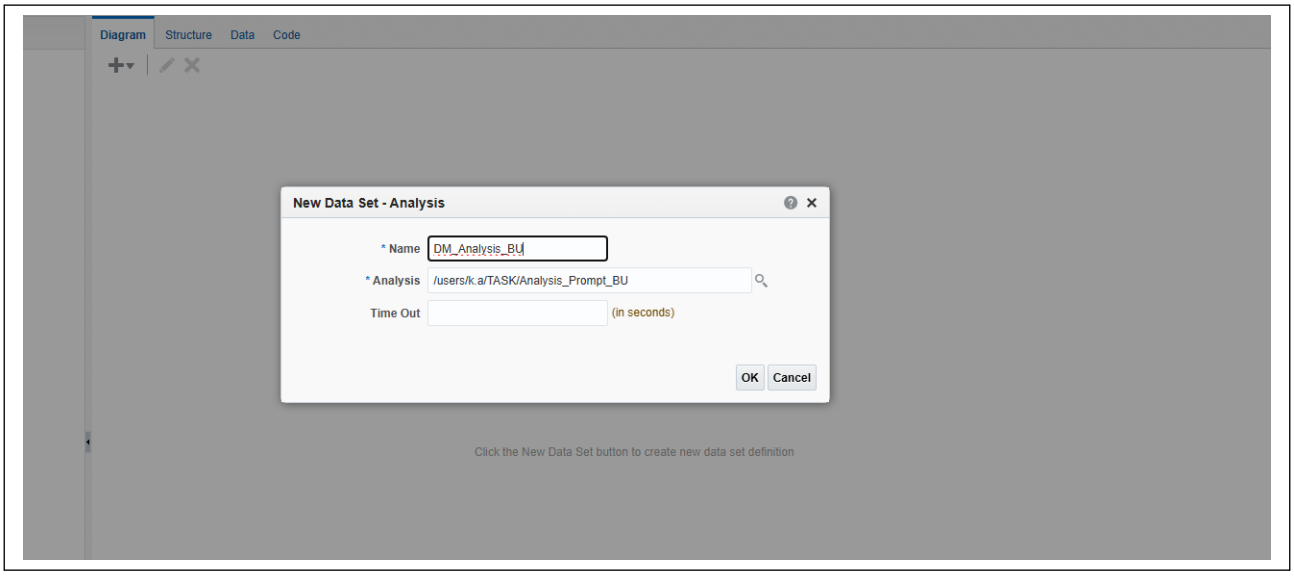

Diagram > + > Analysis

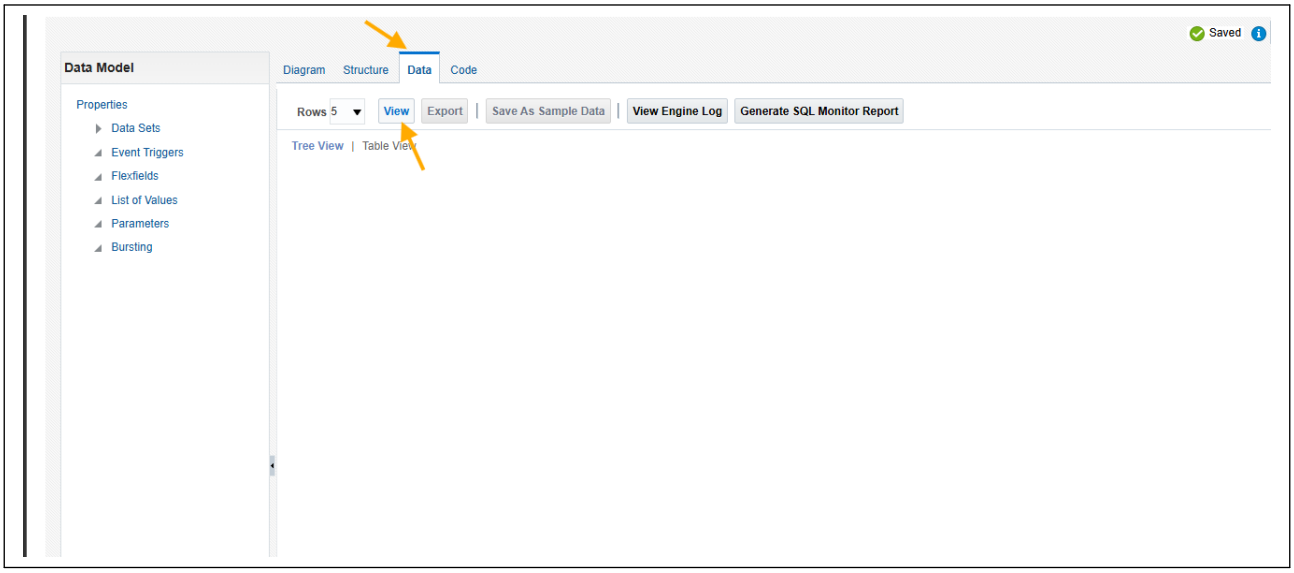

New Data Set - Analysis: Name and Analysis path

3. View the data

10. Click the **Data** tab.

11. Choose **Rows** (e.g. 5) and click **View**. Switch between **Tree View** and **Table View**.

12. Click **Save As Sample Data** (needed to build the report layout).

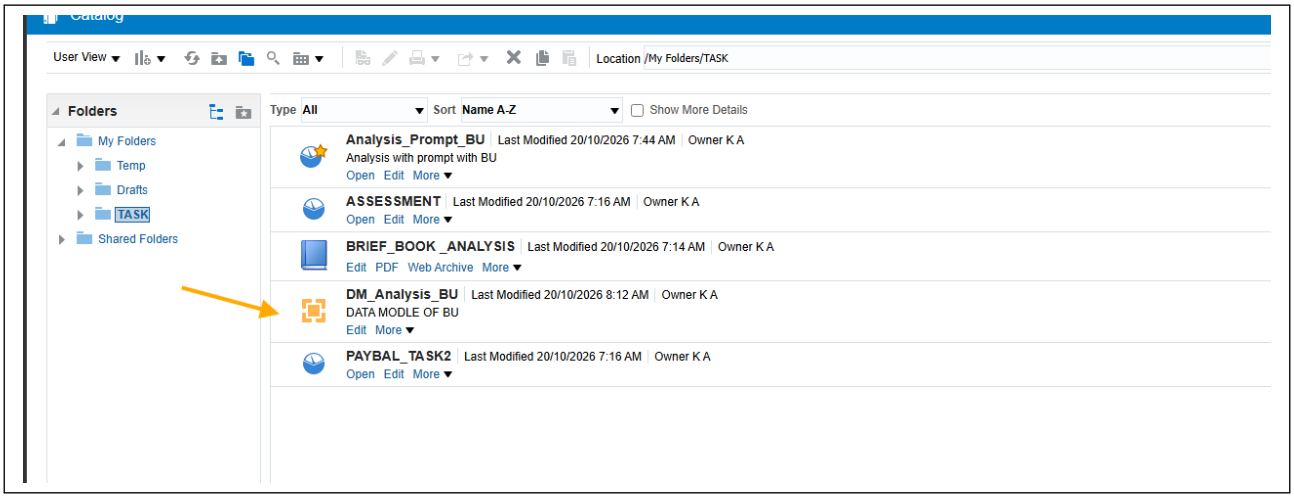

Data tab > View

4. Save the Data Model

13. Click the **Save** icon (top right) > My Folders > **TASK** > Name **DM_Analysis_BU**, Description **Data model of BU** > **OK**. A green **Saved** message appears.

14. In the Catalog, **DM_Analysis_BU** appears with the orange data model icon.

Catalog: DM_Analysis_BU saved in TASK

5. Create a Report based on the Data Model

15. In the data model click **Create Report** (top right) > **Use Report Editor** > choose a **Table** layout.

16. Drag the columns into the layout > **Save** in TASK (e.g. **RPT_BU**).

17. Click **View Report**. Actions (gear) > **Export** > PDF / Excel - the file will be downloaded.

6. Security - give permission (Owner) to another user

18. In the Catalog (My Folders > TASK) click **More** under your object > **Permissions** (or select it and click **Permissions** in the Tasks pane). You (K A) have **Full Control** and the **Owner** radio button.

19. Click the **+** icon. The **Add Application Roles and Users** window opens.

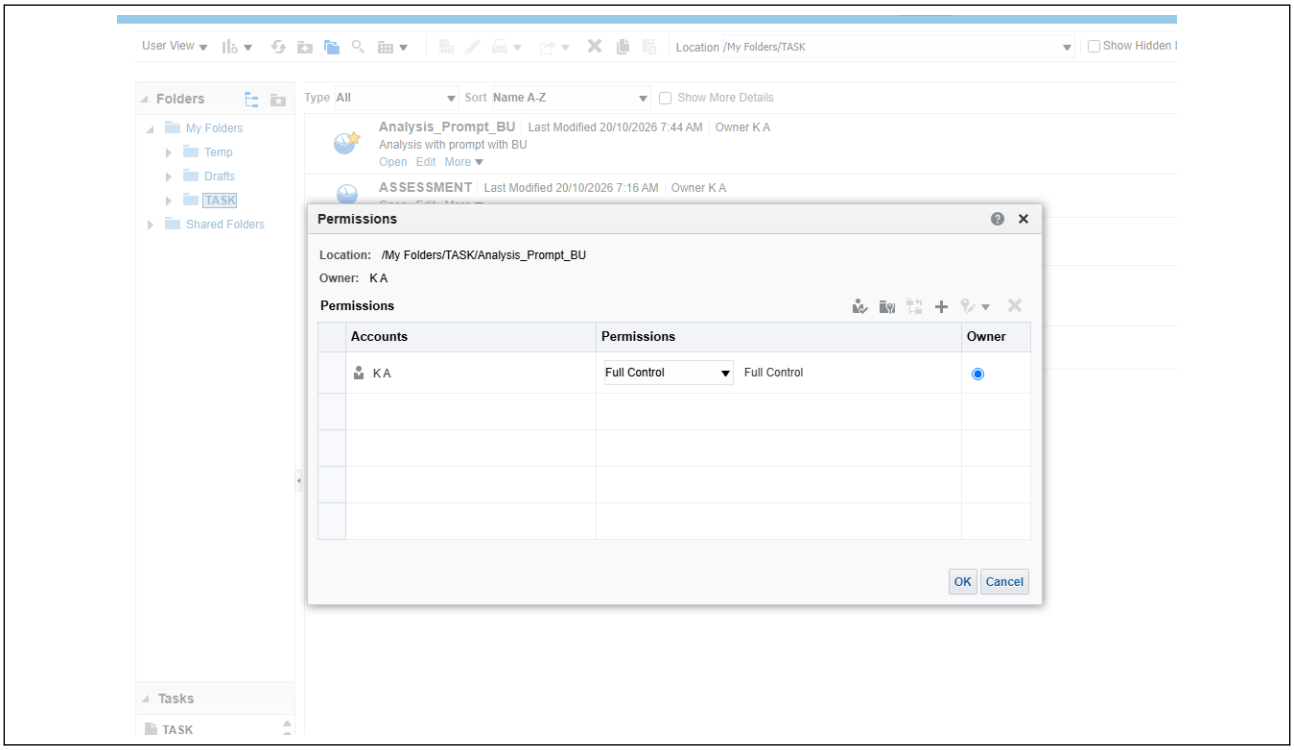

20. Change **List** from *Application Roles* to **Users**, type the user name in **Name** and click **Search**.

21. Select the user in **Available Members** and click **>** to move them to **Selected Members**.

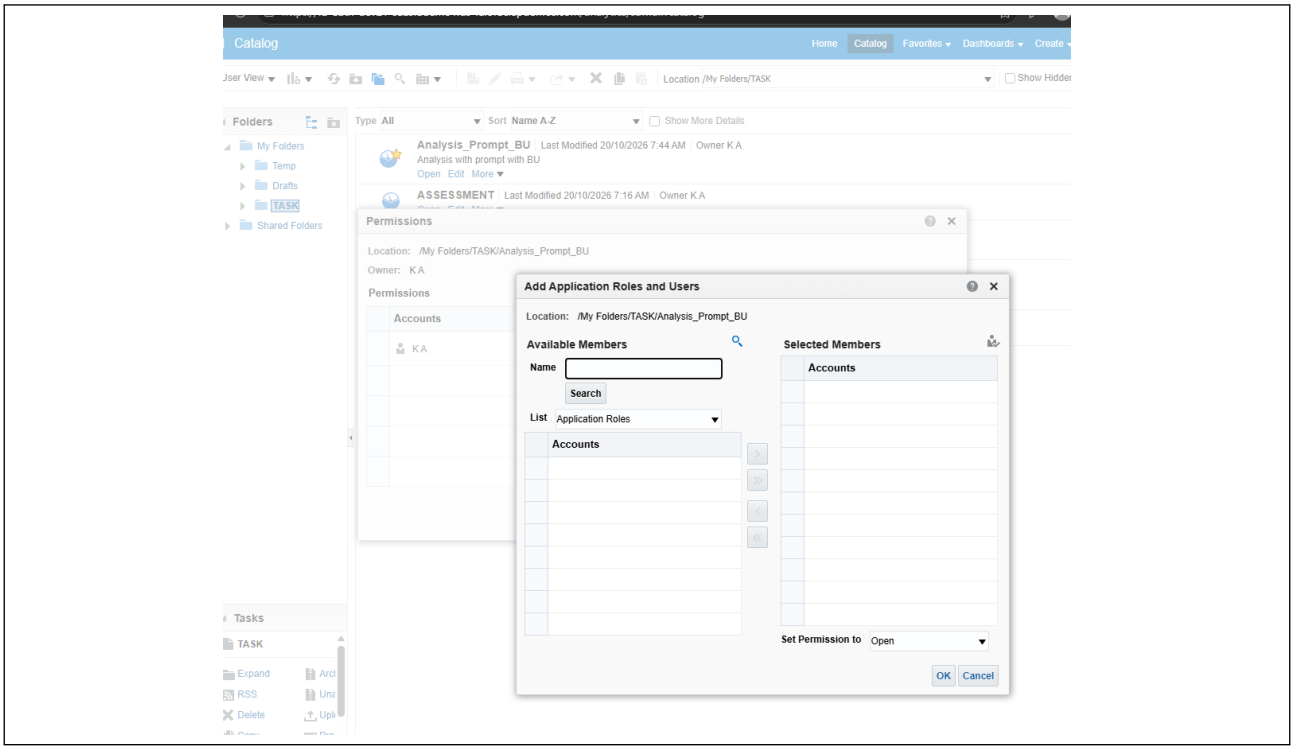

22. In **Set Permission to** choose **Full Control**, **Modify**, **Open**, **No Access** or **Custom** > **OK**.

23. Back in Permissions, to make that user the **Owner** select the **Owner** radio button on their row > **OK**.

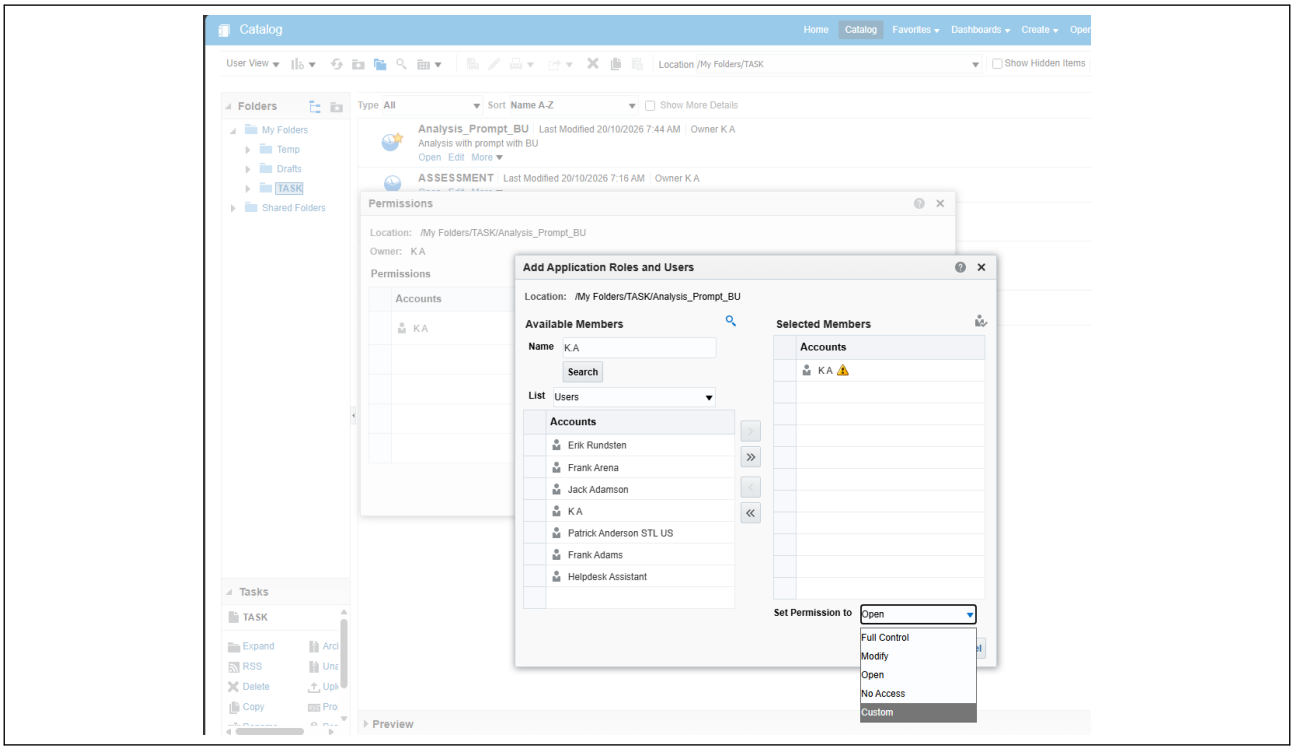

24. Do this for each object type: **Analysis**, **Data Model**, **Report** and **Dashboard**.

Permissions window - K A is Owner with Full Control

Add Application Roles and Users - List = Application Roles by default

List = Users, Search, move the user to Selected Members, choose Set Permission to

Expected result: Data model **DM_Analysis_BU** and report **RPT_BU** in My Folders/TASK, built on Analysis_Prompt_BU.

Tips: • If **Create Report** is greyed out, click **Save As Sample Data** first.
• If View returns no data, check Data Access (Task 2, section 1).
