Oracle Fusion: Provide Data Access to a User

Class Assignment: Create a user, assign roles, create an OTBI analysis, then provide data access and check the result.

1. Create the User (Admin)

1. Sign in with the admin account.
2. Navigator > Tools > Security Console.
3. Users tab > Add User Account.
4. Fill in:
    - Associated Person Type: None
    - First Name, Last Name
    - User Name (example: K.A)
    - Password, Confirm Password
5. Click Add Role, search each role, select it, then click Add Role Membership:
    - IT Security Manager
    - Employee (ORA_PER_EMPLOYEE_ABSTRACT)
    - Accounts Payable Manager (ORA_AP_ACCOUNTS_PAYABLE_MANAGER_JOB)
6. Click Done.
7. Click Save and Close.

2. Create the Analysis (New User)

1. Sign out, or open an InPrivate window (Ctrl + Shift + N).
2. Sign in with the new user.
3. Navigator > Tools > Reports and Analytics.
4. Browse Catalog.
5. Create > Analysis.
6. Subject Area: Payables Invoices - Transactions Real Time.
7. From the Invoices folder add:
    - Invoice Currency
    - Invoice Currency Name
    - Invoice Amount
    - Invoice Amount Paid
8. Click Results. Result: No Data (the user has no data access).
9. Save the analysis (example name: ASSESSMENT).

3. Provide Data Access to the User (Admin)

1. Sign in with the admin account.
2. From Home, click your login name (top right) > Setup and Maintenance.
3. Click the Tasks icon (right edge of the screen) > Search.
4. Type: Data Access > click Search.
5. Click All User Data Access > Manage Data Access for Users.

6. In User Name, enter the new user > Search (the user has no data access yet).
7. Click + Create and fill in:
    - User Name: the new user
    - Role: Accounts Payable Manager
    - Security Context: Business Unit
    - Security Context Value: US1 Business Unit
8. Click Save.
9. Click Close.

4. Check the Result (New User)

1. Sign in with the new user.
2. Reports and Analytics > Browse Catalog > open the saved analysis.
3. Click Results. The invoice data now appears (EUR, GBP, INR, USD).

Notes

- Use the global Search from the Tasks panel, not the search inside an offering (like Compensation Management).

- If the user does not appear in Manage Data Access for Users, run Import User and Role Application Security Data from Tools > Scheduled Processes.

- If you see 'You are already logged in', use an InPrivate window or close all browser windows.

- Role = what the user can do. Data Access = which data the user can see.
